CROSSFIELD

BASEBALL TOURNAMENT SATURDAY, AUGUST 20

The four teams of the Bush League, Madden, Dog Pound, Cremona and Water Valley have entered the baseball tournament to be played at Crossfield on Saturday, August 20.

The draw will be made on the grounds at 12.45, and the first game will start at 1 o'clock sharp, second game at 2.45 and the final game at 6.15 sharp.

Cash prizes are offered for the winning and second team; also a number of cash prizes for the players making the most home runs, triples, doubles, etc.

The business men of Crossfield are also offering a number of prizes for the pitcher securing the greatest number of strike-outs; the fielder or have the greatest number of put-outs and so on. (See complete list at the Oliver Cafe.)

Special Prizes

A prize is offered for the largest family on the grounds; the thinnest man on the grounds; the heaviest lady residing west of Sunshine school; for the heaviest lady residing east of town; the oldest man on the grounds, and for the boy or girl with the most freckles.

Horseshoe Pitching Contest

A good prize is offered to the horseshoe player who can throw on the most rings with 50 shoes.

This will be the last big day before harvest—bring the family and the lunch basket.

Admission: Adults 25c for the three games; school children free.

Remember folks, this a good will tournament and an opportunity to meet your friends from the West.

CAR CATCHES FIRE

Frank Watt had his Ford coupe damaged by fire on Tuesday night on the highway about five miles south of town. It is supposed that the gas line was leaking and in some way it ignited causing considerable damage to the car before it could be extinguished.

Telephone Lines are Dismantled

During the past week a gang of telephone men have been working in the district dismantling rural telephone lines. They remove the wire leading to the farms where the telephone has been taken out and pull out the poles.

These phones in the country have been removed, not because the farmers do not want them, but simply because, with the prevailing prices of farm produce, the farmers are, for the present, unable to pay for them.

There is no doubt that when farm conditions improve they will be put in again, or at least they would be if the lines were left in, but if the lines have to be rebuilt, it will be years before they are put back in again.

This province has spent a tremendous amount of money in providing rural settlers with telephone service and it seems a shame that these lines, which in many cases the people have waited for so long, should now be scrapped, simply because, owing to conditions over which they have no control, they are temporarily unable to pay for them.

It is planned to start in the morning so that all events may be finished up before dusk.

Tennis Tournament on Sunday

Crossfield Tennis Club will be hosts to the Red Deer Tennis Club on Sunday when a friendly tournament will be played.

It is planned to start in the morning so that all events may be finished up before dusk.

Crossfield players were successful in winning a majority of the matches at Red Deer recently and some good tennis is looked for.

A tea and sale of home cooking will be held by the Women's Guild in the store adjoining Halliday's on Saturday Aug. 27th. Your presence will be much appreciated.

Harvest Commences

Harvest is again drawing pretty close and a few farmers in the district have already commenced cutting.

Wilson Stafford, Frank Troa, J. Milner, H. Robertson, H. Stewart have already started cutting wheat. C. Konluk has been cutting early sown barley. J. P. Metheral has finished cutting a field of rye. Geo. Leask of Madden is harvesting broom grass for seed. It is expected that cutting will be general east of town on Monday next. West of town will be somewhat later.

The heavy rain on Thursday night last which was of several hours duration, came at the right time and will help late grains and gardens materially.

Crop conditions are good and yields of wheat as high as 40 bushels is predicted with an average of 25 bushels for the district.

Local J. P. Hears Four Cases Under the Noxious Weeds Act

On the 17th A. W. Gordon, local J. P. had quite a busy session sitting on cases all day for infractions of the Noxious Weeds Act.

The following appeared before him on information laid by E. M. Crisfield, Weed Inspector of the Municipal District of Rosebud, charged with not having their weeds destroyed after being served with notices to do so.

R. T. Hemm, Crossfield; P. Fullerton, S. McLean, G. Hope, from east of Carstairs. All the defendants pleaded not guilty. After hearing considerable evidence His Worship found them guilty and fined them \$1.00 and costs each.

A charge of the same nature was preferred against Robt. McLeod. Mr. McLeod asked for an adjournment which was granted and the case will be heard on Friday, August 26.

J. S. Jarman, R.C.M.P. prosecuted.

Youth Drowns in Swimming Hole East of Crossfield

Leslie Lafleur of Acme, 18 years of age, was drowned in a swimming hole on the farm of Cherry Motter, 12 miles northeast of Crossfield on Sunday afternoon. He and four other companions were swimming in about ten feet of water when the lad disappeared. His companions tried to rescue him but failed. Cherry Motter was called, who notified the R. C. M. P. at Irricana and Dr. W. F. Edwards of Airdrie.

The police tried grappling irons to no avail. Mr. Motter dived in and brought the body to the surface four hours after the accident.

Deceased was born at Horizon, Sask., had been employed as a farm hand for the past year on the farm of Walter Knight. For six years before that he had lived at the home of his grandmother, Mrs. R. Waidie of Airdrie. His mother died in 1916 and his father in 1920.

Final Pool Payment Announced

The amount of the final payment for the Alberta Wheat Pool of 1931-32 was announced by the head office on Saturday, and it will be 11.45 cents per bushel for No. 1 Northern, making a total of 56.45 cents per bushel in store at Vancouver.

Carl Axelson, prominent Labor and Farmers Unity League leader, was found dead hanging in his barn early Monday morning.

A son was born to Mrs. Charles A. Lindberg, at Englewood, N. J., on Tuesday.

Considerable hail is reported to have fallen south-west of town during the heavy rain storm Wednesday night.

Fragrance Sealed In Metal

"Fresh from the Gardens"

Mutual Trust Must Be Re-established

One of the most interesting and thought provoking articles it has been our privilege to read for some time, and in these days of depression and pessimism it is as refreshing as a heavy shower on parched land, appeared in a recent issue of "Toronto Saturday Night" from the pen of Nicholas Ignatieff, a gifted young Russian engineer and thinker now resident in Canada. Mr. Ignatieff knows his native land and has written thoughtfully and sympathetically of it, but in the article to which we now refer he writes of "the British Empire as a new Canadian sees it."

As he sees it the British Empire is not menaced so much by external enemies, by Bolsheviks or Communists, as by crass materialists within the Empire itself who insist on dealing exclusively with material, economic values—those individuals who have abandoned the best traditions of the Anglo-Saxon race and have plunged into the abyss of crude money-worshiping, greedy, corrupt politics which care nothing for duty and public service. The real enemies of the Empire are those who have cut themselves away from the vital sap of the historical, spiritual life of the mother country.

Mr. Ignatieff declares that it is not only his conviction, but the conviction of one of the foremost economists of the British Empire, Sir George Palah, that the way to general recovery does not lie so much in the field of economics as it does in the moral, spiritual sphere, which affects primarily our politics, and reflects adversely on economics. Sir George Palah points out that as long as politics are dominated by fear, suspicion, distrust and narrow self-sufficient nationalism, no economic remedy can solve the depression; and just as soon as our mental attitude is changed and gives place to a desire to co-operate, compromise and trust one another, the economic situation will solve itself. In his book, "The Way to Recovery," Sir George declares: "By replacing fear with confidence, injustice with justice, and antagonism with co-operation, a new and infinitely greater era would be introduced."

Continuing, Mr. Ignatieff says that when it is pointed out that one of the root causes of depression is the collapse of our present credit system, it is never realized by the crass materialist that here we are dealing practically exclusively with moral values. In the first place, credit being based on the future, it is obviously non-material; it is primarily based on trust. The general break-down of credit implies nothing more than the collapse of morals, the break-down of mutual trust. Internationally, countries are no longer trustworthy because they do not honour obligations, because they are suspicious and fearsome, selfish and greedy. Within nations, the same applies among individuals—there is general misuse of credit—credit is employed largely for anti-social purposes by greedy, unscrupulous, immoral individuals. The solution of the paradox of scarcity in the midst of plenty is spiritual, not material. A little thought will convince one of the truth of these observations, yet they are dubbed "platitudes" by so many worldly-wise people.

Until fear is dispelled, suspicion allayed, confidence restored, there can be no real and lasting economic recovery, because, until these better conditions prevail, credit cannot be re-established. Credit is founded upon these things; trust is the one permanent foundation upon which a credit structure can be erected, and until credit is restored the world will remain economically sick. So long as fear and suspicion rule men and nations, so long as narrow nationalism, because of such fear and suspicion remains the guiding policy of the nations, so long will trade obstructions be maintained, so long will there be an absence of credit. And just so long will the peoples of the world suffer economic hardship and loss. Therefore, it can be repeated, what the world stands in need of today is a spiritual readjustment rather than economic reorganization. Given the first, the second will automatically and quickly follow. But without the one the other is impossible.

Lack Real Leadership

U.S. Public Opinion Not Yet Ready For Debt Readjustment

The New York Evening Post, agreeing that virtual cancellation of war debts must come, says that general American opinion is not quite ready for the debt readjustment which her eastern seaboard now recognizes as inevitable. "Public opinion" is not quite ready because the United States public men and the press have persisted, chiefly for political purposes, in pretending, though they must have known better, that the debts were collectable. When they begin to deal with the question realistically, as is now the case, public opinion in the United States will accept the cancellation as not only inevitable but desirable. The people are all right if they are given competent leadership. But what leadership they have had, in all the allied countries, since the war—Winnipeg Free Press.

An Abundant Practice

One well known radio station has decided that in future the names of radio announcers will not be given, and it is said that others are likely to follow suit. The plan has always been about as sensible as it would be for a brakeman to give his Christian and surname after calling out the next station.

"Well, I've brought back the car you sold me."

"How come?"

"When I bought it I thought '1932' was the license number, but now I realize it's the year of manufacture."

Don't leave kind words unsaid. To-morrow may be too late.

Pains In Stomach and Bowels So Bad Would Have To Sit Down

Mrs. G. Landry, Moncton, N.B., writes:—"I can certainly recommend Dr. Fowler's Extract of Wild Strawberry for cramps or pains in the stomach and bowels."

"Last Summer I had such awful pains in my stomach, and lower part of my bowels, at times, I would have to sit down. I took 'Dr. Fowler's' and was soon relieved."

"When my children were small I always kept a bottle in the house and it helped them wonderfully whenever any of them had bowel complaints."

Poor Crop Prospects In Russia

Believe Country Will Need All Its Grain For Food

Poor crop prospects in Russia are indicated in the report by statistics which the Dominion Bureau of Statistics received by cable from its London correspondent. "Grain exports," the summary declares, "are dependent upon the policy of the Soviet Government and the urgency of the need of foreign currency. The country needs all its grains for food, especially in view of the continued acute shortage of other foodstuffs."

Since it was the flood of Russian wheat on the market last autumn that broke the prices, the Russian crop prospects are of particular interest to Canada. Last year Russia exported, to July 31, 71,000,000 bushels, but the present report indicates that it will reach nothing like those proportions this year.

The summary states: "Vegetables are lacking for the winter months and difficult to collect, constitute a large part of the diet of the reserves, excepting army supplies from 1930 crop, are consumed. The foregoing and other factors, including a tremendous discrepancy between open market and collective prices, freedom of peasants to sell on the open market after December, and an acute shortage of manufactured goods to trade for grain, indicate unprecedented difficulties in collecting the government's share of the harvest. Much poorer crops than last year are indicated in the areas around export outlets."

Pension Act Investigation

Criticism Is Offered In Connection With Operation Of Plan

Dissatisfaction with the personnel of the committee which will investigate the operation of the pension act, and disappointment that the organization of which he is chairman is not represented on that committee was expressed at Ottawa by W. J. Young, of the non-affiliated veterans. The representatives of the blind, prize sailors and of the amputation cases, Mr. Young characterized as "privileged legions." Their disabilities were obvious and consequently no dispute arose as to the manner in which pension payments were disbursed to them.

Other conditions, however, developed in connection with those ex-service men whose disabilities were not obvious, he declared, and there were not all represented by the various associations which had been accorded membership on the committee.

"Most of those named in the committee personnel," said Mr. Young, "are connected with veterans drawing the average of 100 per cent pension, and are men with obvious disabilities" receiving the maximum."

He charged that the pension system, which such cases excite was the cause of their appointment. Mr. Young claims to represent over 100,000 ex-service men, from coast to coast.

In Times Of Peace

German Learning Protection Methods Against Gas Attack From Air

Classes have been established in Berlin to train women in the steps they must take for the protection of their household in the event of a gas attack from the air. Lectures are given on such subjects as how to make cellars gas proof. Branches of the "Women's Air Defence League" are being established in several centres throughout the country.

No More Asthma. Dr. J. D. Kellogg's Asthma Remedy shows the death knell of this trying trouble. It stops the awful choking and painful breathing. It guards against night attacks and gives renewed ability to sleep and rest the whole night long. Much is claimed for this remedy, but nothing but what can be demonstrated by a trial. If you suffer from asthma try it and convince yourself of its great value.

Larned a Lesson

A U.S. tourist made loud complaint in Aylmer, Ontario, recently. It seems he had repaid the gas supply at a station in another town with the \$10 U.S. bill in payment, and received his change in good Canadian money. On arrival at Aylmer he endeavored to change the Canadian money back into U.S. funds and was most indignant when the bank demanded a receipt. He learned a lesson in exchange, which has been taught many a Canadian visitor to the U.S.

Cheques Made Of Steel

Steel-jacketed bullets were necessary to cancel three cheques for amounts totalling \$125,000 which were received by the Cleveland Trust Company. Given as prizes for the best discussion on the uses of steel welding, the cheques were made of one-eighth inch steel and all writing was done by arc welding.

FAT GIRLS OUT OF FASHION

Women of All Nations Slimming

All over the world Kruschen Salts is appealing to girls and women who are striving for an attractive free-from-fat figure.

Here is the method they are following to banish fat and bring into bloom all the natural attractiveness that they possess: every morning they are striving for an attractive free-from-fat figure.

At the same time the stomach, liver, kidneys, and bowels are toned up and the pure, fresh blood containing Nature's six life-giving salts is carried to every organ, gland, nerve, and fibre of the body and this is followed by "that Kruschen feeling" of energetic health and activity that is in itself a most refreshing and cheerful vivacity, and a charming figure.

Improving On Nature

Soil Heated By Electricity Can Be Kept At Even Temperature

Soil heating by electric current has come to be recognized as an aid to the grower to get their produce to market earlier and secure better prices. Equipment for heating beds, including cable and thermostats, was sold to farmers in the United States last year for the first time and several plants were set up in Canada. The bulk of the power is used between sundown and sunrise, making it practically an off-peak load.

The advantage of electric heating over steam or manure is seen in the more complete control. Flowers, such as Easter lilies can be speeded up and a greater percentage of growth is seen in cuttings of plants. Celery appears to respond particularly well to the electrical current.

Serum For Addison's Disease Is Expensive

Fifteen Oxen Are Required To Supply One Dose

Fifteen oxen are required for a newly discovered treatment for Addison's disease.

Successful results of the treatment have been obtained at a London hospital.

Fortunately the disease which attacks the pituitary gland and stops growth is rare, for the expense of extracting one dose of serum from fifteen oxen is enormous.

The life of one patient was saved with this new treatment, but \$125 was spent on him to do it, and the treatment continued to cost \$5 a day.

Persian Balm is unrivalled for promoting feminine loveliness. Tones and rejuvenates the skin. Makes it exquisitely soft-textured. Makes hands flawlessly white. Especially recommended to soothe and relieve roughness or chafing caused by weather conditions. Indispensable to every dainty woman. Cool and refreshing. Absolutely fragrant. Magic in its results. Never leaves a vestige of stickiness. Persian Balm is the one toilet cream for the woman who cares for charm and elegance.

Many Placed In Employment

Saskatchewan Government Finds Jobs For 2,511 Persons In Five Weeks

Jobs for 2,511 persons were found by government employment offices in Saskatchewan during the five weeks ending July 30, official figures indicate. The number of persons applying for work at the nine employment offices in the province during the period were 2,928, and the number of employers' orders received were 2,637.

In addition to these figures there were 187 applications received from school teachers and 69 of these were located with positions.

Not So Weak

Sir William Arbuthnot Lane says that women will always live longer than men. This "weaker sex" talk is refuted by an enormous reserve of energy and vitality, and also for the reason that their lighter clothing enables both "sunshine and air to get to the skin." This "weaker sex" talk is manifestly an entire misapprehension.

PERSONAL

SCOTTISH LADY AT PRESENT IN S Canada, would like to take in charge one of our young ladies. Has experience in travel abroad, and with Canadian girls. Could act as companion to lady, in any part of Canada, or as travel companion. Has excellent testimonials both in Canada and in foreign countries. Will gladly give information to interested party—Apply Box 50, Winnipeg Newspaper Agency, 175 McDermott Ave., East Winnipeg, Man.

Northern Air Mail Service

Extends From Great Bear Lake To Lonely Arctic Points

Extension of mail service by means of private flying facilities to meet needs of those in the Coronation Gulf and other parts of the Arctic, was announced by Major R. W. Hale, superintendent of the Edmonton postal district.

Instead of those living along the Arctic coast having to wait for indefinite periods, even two years at times, before receiving mail by boat from Akhivik, they will now receive mail at much shorter intervals.

Arrangements have been made for the mail to be sent to Coronation Gulf, Victoria Island, and other non-post office points by a route that extends from Great Bear Lake, instead of the round-about way through Akhivik.

When aeroplanes leave Great Bear Lake for the 150-mile flight to Coppermine post on the Arctic coast, they will carry mail that has been routed to the mining region for northern delivery.

The points which will be served in this way include the following: Bay 66, Cameron Bay, Lindsey Bay, Glacier Bay, Echo Bay, Labine Point, Contact Lake, Hunter Bay, Domex Bay, Coppermine, Fort Hearns, Diamond Lake, Borneo Lake, Cambridge Bay, Bathurst, Reid Island, King William Land, Bernard Harbor, Wilnot Island, Walker Bay, Peterson Bay and Tree River.

At all likelihood, it will not be long before a post office is established at the mouth of the Coppermine River.

Recipes For This Week

(By Betty Barclay)

RIPE PLUM JAM—RIPE PRUNE JAM

4 cups (2 lbs.) crushed fruit.
 1/4 cup water.
 7 1/2 cups (3 1/2 lbs.) sugar.
 1/4 bottle fruit pectin.

To prepare fruit, pit about 2 1/2 pounds fully ripe fruit. Do not peel. Cut into small pieces and crush thoroughly.

Measure fruit solidly packed, and water into a large kettle. (For Ripe Plum Jam, add juice of 1 lemon.) Stir until mixture boils, cover, and simmer 15 minutes. Add sugar, mix well, and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 1 minute. Remove from fire and stir in pectin. Skim, pour quickly. Paraffin hot jam at once. Makes about 11 glasses (8 fluid ounces each).

APPLE MOCK MACARON FIDDING

8 cups apple sauce, fresh or canned

1 cup rice flakes, crushed.
 1/4 cup nuts, finely chopped.
 2 tablespoons butter, melted.
 1/4 teaspoon almond extract.

Put half the apple sauce in a buttered baking dish. Combine rice flakes, crumbs, nuts, butter and almond extract and cover apple sauce with half the prepared crumb mixture. Repeat layers. Bake 30 minutes in a moderately hot oven (375 degrees Fahrenheit). Serve hot or cold with cream or soft custard. Serves 6.

Infantile Paralysis

Belief Expressed That House Flies Carry Germs

Possibility that there is some slight connection between the cause of infantile paralysis occurs most frequently during the "house fly season" is suggested by Dr. W. J. Bell, Deputy Minister of Health for Ontario.

"It is pure theory," Dr. Bell said. "There is no scientific explanation for the fact that infantile paralysis occurs generally during the summer months, but the coincidence that germ-bearing house flies are most prevalent at that time may be significant."

Keep Douglas' Egyptian Liniment

Always in the stable, ready for immediate use. Removes profuse heat and inflammation. Thrush or Hoof Rot, and infection of cow's teats.

Walks Across Canada

Setting out afoot from New Westminster, B.C., on April 14, Frank G. Potter, a former Nova Scotian who was married in Halifax, recently on route to his old home in the Annapolis Valley. He had last visited his home in 1919. Mr. Potter walked most of the distance from the Pacific Coast but received a motor lift at intervals.

The oldest cemetery in Canada is thought to be the one adjoining old Fort Anne, Annapolis Royal, Nova Scotia.

In ancient Babylonian, medicines were frequently mixed in beer.

Stops Summer Odors

The heavy smell which warm weather brings to many people is largely prevented by regular bathing with a free lather of Baby's Own Soap.

The delicate aroma dispels all unpleasantness and the skin feels refreshed, cool and sweet. Baby's Owns sells at 10c. a cake at dealers everywhere.

"Best for you and baby too."

A Warmer Climate

Scientists Predict Radical Weather Changes In The Future

Sometimes you hear people who lament the present condition of mundane affairs express the wish that they might be living on this planet a few thousand years hence. They are sure there will then be more culture more altruism, more highly improved mechanism, a happier state of things all around.

But, according to the recent pronouncements of scientists, there will be great drawbacks to the enjoyment of an Edenic existence in those future days, and one of these will be a devastating flood. Dr. W. J. Humphreys, professor of meteorology of the United States weather bureau, says that with the vanishing of the great 6,000,000 square miles of ice sheets at and near the pole and in the high mountainous areas will be raised 151 feet.

In this dismaying prediction Dr. Humphreys is supported by Professor David, of Australia; Professor Molander, of Germany, and others, who also accept the theory of the American scientist that it's going to be pretty warm in the present temperate zones, for as the ice melts the tropics will press upon them and the ice in turn will press upon the polar regions. — Los Angeles Times.

Miller's Worm Powders were devised to promptly relieve children who suffer from the effects of worms. It is a simple preparation to destroy stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, this is an indication of their powerful action and not of any nauseating property.

Business Is Growing

Increase In Air Passengers Between Germany and Russia

Air service between Germany and Russia continues to grow. Estimates are that "Deruluit," the German-Russian air transportation company, will carry this year at least nine times as many passengers as it did in its first 12 months nine years ago. Mail, baggage and freight also have made great gains. Two services are operated, one between Berlin and Moscow, and the other from Königsberg to Leningrad. The latter service has increased from two to seven times a week.

Rub It In For Yams Back—A brisk rub with Dr. J. C. Williams' Back Oil will relieve lame back. The oil will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes. Rub it in the same simple grounds for saying that it is an excellent article.

Origin Of Word "Candy"

Soldiers with Alexander the Great were the boys who put the word "candy" into general circulation. Dr. C. A. Brown, chief of the United States Bureau of Chemistry and Soils, says the soldiers were in India when they ran across a sweet cane the Indians called "kand." They took the word back to Macedonia and since that time, it has been slowly modified until today we have "candy."

Trump to Aberdeen on four-story flat: "Can ye gie me tuppence for a bed?"

"Bring it up till I see what it is like!"

PURELY VEGETABLE

Take them every so often. They'll keep you HEALTHY.

Sold everywhere in 25c and 75c red boxes.

CARTER'S LIVER PILLS

W. N. U. 1935

A Separate Grade For Garnet Wheat Is Sought By British Milling Interests

Continuation of the policy of permitting Garnet wheat to be mixed with Marquis and Reward varieties, or of marketing it as No. 1 and No. 2 Northern wheat will react sharply against all wheat sales from Canada, in the opinion expressed by William Smith, chief grain buyer and miller for the Scottish Co-Operative Wholesale Society.

The British miller, he stated, had found the Garnet variety unusable for milling purposes in Britain. At a recent meeting of the milling and grain interests held in London a decision was taken which called for the special grading of Garnet wheat as distinct from the other Canadian wheat varieties.

"It is to the interest of the Canadian wheat producers to see that this separate grading is undertaken," stated Mr. Smith. "The British buyer of wheat is determined that when he purchases grain on the Canadian market that the commodity supplied him will be either No. 1 or No. 2 Marquis or Reward. Any purchases of Garnet variety made will only be bought on the strict understanding that it is of this variety, and at a price considerably below that paid for the other standard Canadian varieties."

Reasons given by Mr. Smith for the objection of British and Scottish millers to Garnet were that it lacks in protein values and also that its baking qualities lack strength and stability as compared with the Marquis and Reward varieties.

Mr. Smith was definite in his statement that he did not wish to be construed as advocating the non-grading of Garnet. "This may be the best type of wheat to grow in certain districts, but for its successful marketing it must be labelled what it is and not be placed on the market as holding grade with the other Canadian varieties."

Unless there is a separate grade for Garnet, British millers and grain buyers will be forced to divert their purchases to other channels, and there is no assurance to them that the wheat bought will be the required Marquis or Reward varieties.

A further factor, said Mr. Smith, which must be considered is that the continuance of a policy of not grading the Garnet wheat may result in definite lowering of the price of all Canadian wheat on the British markets.

Lets Electricity Do It

Farmer-Legislators Use Modern Method To Remove Stumps

When J. W. Barry, member for the Delta in the British Columbia legislature, wants to remove stumps from his big farm near Langley, he just turns a switch and lets electricity do the work.

Approaching the stump with an electrically-driven auger, the stump expeller pierces each of the large roots to a depth of about nine inches. Into the holes he pours a spoonful or so of gasoline and cylinder oil. Blasts of air are introduced into the holes through iron pipes attached to rubber hose.

The oil mixture is touched off with a match and soon the entire middle part of the stump is incandescent as the heart is being eaten away by the flames. Air is forced under electrical pressure through the iron pipes so the fire is maintained under forced draught until the whole of the stump is destroyed.

New Natural Gas Producer

A large flow of natural gas has been struck in the Kinross field, southeast of Edmonton, Alberta. The new producer is reported to have a flow of 7,600,000 cubic feet per day.

A new bathing "suit" has been designed, in which, after it has been inflated, the wearer can float for hours.

Professor: "Once again I have come out without my umbrella."—Mocha, Warsaw.

W. N. U. 1955

Hard Task For Doctor

Valuable Snake In London Zoo To Have Glass Eye

Fitting a snake with a glass eye is the delicate operation which faces a doctor when he works on a huge Madagascan boa in a London zoo.

Some time ago this rare and valuable boa became blind in one eye. It was found that the eye was badly damaged and causing much pain.

The offending eye was plucked out, and the snake's normally good spirits returned.

But the boa had lost much in beauty. Therefore, a suitable glass eye has been selected, and will be fitted in.

New Pastime For Blind

Invention Enables Sighted Persons To Do Crossword Puzzles

A London doctor has made an invention whereby the blind can do crossword puzzles and acrostics. The inventor is Dr. F. W. Alexander, a former medical officer, and the inspiration came to him as he passed a laundry.

The invention is based on the Braille reading system for the blind, and is composed of a laundry-board studded with nails denoting groups of the alphabet. Numerous games can be played on this device.

LOVELY NEGLIGEE WEAR OR HOSTESS GOWN, WITH FABRIC STAMPED ALL OVER IT

Who doesn't adore the new negligee—long to the ankles, making one look just as slim and graceful as a reed.

Well here is a model that will do the trick for you.

And imagine how simple it is to make, too. In these days of complicated cuts, this will be as simple as eating apple pie.

It is cut fairly close about the hip area, and adjusted by an attached sash. Another interesting thing about it is the shoulder yoke which offers many schemes for contrast.

Such a model is today's pattern which can be carried out in crepe satin, chiffon in plain or print, rayon novelties, etc., but is especially nice in two tones of crepe silk as the original.

Size 36 requires 4½ yards 35-inch with 1 yard 39-inch contrasting.

Style No. 655 is designed for sizes 14, 16, 18, 20 years, 36, 38, 40 and 42 inches bust.

Price of pattern 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Latest Scientific Wink

ink Spot Picture Used To Analyze Human Brain

ink spots are the latest scientific wrinkle by which psychiatrists can examine the human brain and determine whether individuals are normal or abnormal.

Hundreds of tests made by Mrs. David Ralph Hertz, wife of Traction Commissioner Hertz, of Cleveland, have established positively that reactions of individuals to ordinary ink spots can be used by psychiatrists to analyze them.

There is nothing mysterious about the spots, even though their use seems to lean toward black magic. Every school child has dropped a dab of ink on a piece of paper, folded it and then guessed what it looked like.

And that procedure is exactly the one Mrs. Hertz follows. She is working in conjunction with Samuel Beck of Boston. Beck is making charts of the reactions of abnormal people and Mrs. Hertz charts of normal humans.

"Of course, the test is only begun," she said. "Hundreds of more examples will have to be taken. But this test of mine has proved the process is practical."

Mrs. Hertz first tested 300 children in a junior high school. Using 10 ink spots, she allowed each subject to look at each spot for two minutes, jotting down verbatim everything said.

Then she compared the answers with hundreds of others she got from special groups of psychoneurotics, maladjusted girls and feeble-minded. By finding the normal for each special type, Mrs. Hertz can work backward and quickly classify an unknown case.

Normal people seemed to see animal and insect life in the spots. Psychoneurotics were sensitive to color in some spots and most of them saw parts of the human body in the spots. The feeble-minded visioned far-fetched likenesses. With a natural antagonism to social tenets, the maladjusted girls made their first remarks about the white spots left by the ink as it spread. That's called perseverance.

Well Known "Mrs. Grundy"

Famous Character Came Into Existence In English Play

That famous character "Mrs. Grundy" came into existence in a play called "Speed the Plough," written by Thomas Morton, and produced some hundred and thirty years ago. In this play one of the characters has a habit of dragging her neighbour, Mrs. Grundy, into everything she says. At last her husband bursts out: "It is always 'What will Mrs. Grundy say?' What will Mrs. Grundy think?" Actually, Mrs. Grundy never once appears on the stage! But the constant reference to her opinions appealed to the public fancy and she still survives as a stickler for the proprieties.

FROUD OF GAVEL

Mr. Stewart Young, of the Town Planning Branch of the Saskatchewan Department of Municipal Affairs, proudly displaying a gavel sent to him as Secretary of the Saskatchewan Land Surveyors Association by J. Lonsdale Doupe of Winnipeg. The gavel is made from oak grown on grounds of the pioneer home of the Inkster family at Kildonan, Manitoba.

Red Clover Seed

High Grade Seed Brings Three Cents Per Pound More Than Ordinary Article

According to a news report going the rounds of the press, farmers of the Stittsville (Ontario) district, recently sold a shipment of 33,000 pounds of red clover seed which was graded and sealed as Certified, No. 1.

This seed brought 3 cents per pound more than dealers were offering for ordinary No. 1, proving once more that it pays to grow the best. Watch the Stittsville men when the World's Grain Exhibition and Conference takes place at Regina next year. At this great all-Canadian, open to the world show, there are four classes for clover seed with \$6,000 in 110 cash prizes. There are three firsts each of \$300.

Tests Were Successful

A successful secret test of a new torpedo-like rocket was conducted at Duemmer Lake, near Osnabrueck, Germany. The rocket, invented by the Hanover engineer, Reinhold Tilg, is about eight feet long and equipped with wings about 10 feet wide. The rocket shot into the air and the wings unfolded at an altitude of more than 5,000 feet, permitting the rocket to glide to earth.

Creamery Butter Production

The quantity of creamery butter produced in Canada in 1931 is the largest ever recorded by the dairying industry of Canada. It amounted to 225,000,000 pounds, an increase of about 40,000,000 pounds over the previous year. There are 2,685 dairies in operation in Canada.

SPRING-CLEANING AN EMPRESS

Under special arrangement with the Dominion Government the Canadian Pacific Empress Liners will, in future, have their annual summer overhaul in the great drydock at Victoria, British Columbia, instead of at Hong Kong, as in the past. Our picture shows the R.M.S. Empress of Russia in drydock, the first of the Canadian Pacific Fleet to be spring-cleaned in Canada. The "Empress of Russia" is 370 feet long, with a beam of 68 feet, but she looked small in the mammoth Victoria drydock which is 1,150 feet long with a minimum width of 124 feet. The drydock has a capacity of 42,000,000 gallons yet can be pumped dry in four hours.

The Victoria dock is exceeded in size only by the Commonwealth Dock of Boston, which is 29 feet longer. The new Southampton dock is 1,200 feet long but over all is not as large as that at Victoria.

The Dominion Government, in order to bring the work to Canada, granted special concessions which will result in the expenditure of some \$150,000 on labour plus the cost of material.

Additional Sites Recommended For Marking By Historic Sites and Monuments Board

Archaeologists May Be Making Great Discovery

Believe Manger So Long Venerated Is Not True One

Excavations started after an accidental discovery are expected to reveal the manger in which Christ was born.

A rock-hewn grotto at the Church of the Nativity at Bethlehem has been shown for centuries as the manger, but the new excavations seem to show that tradition has been mistaken.

Though it is agreed that the Church of the Nativity, the oldest Christian building in the world, stands on the site of the inn where Mary and Joseph sought shelter, not all authorities believe the manger now venerated to be the actual one.

The Church of the Nativity actually is a series of monasteries and churches of three sects—Grecia, Latine and Armenians—under one roof. Below the transept, reached by a circular staircase, is the Grotto, or Chapel of Nativity.

The movement in the underground Chapel of Nativity was broken. After discussion between the three sects it was arranged that the public works department of the government should replace the flagstone floor.

When the workmen removed the old stones and started digging, they were surprised to find the remains of some former building.

The antiquities department in Jerusalem were called in, and walls, pillars, doors and stairs were revealed. Government archaeologists are now signing shafts at three places.

It is thought by some experts that the remains found are part of the original church erected by Constantine the Great, the first Christian emperor, in the year 330. These parts, apparently, were covered by Justinian, who made alterations two centuries later.

A new pavement has been found and a subterranean vaulted roof.

Through this massive roof is being sunk a shaft into what may be the actual manger, the stable portion of the inn where Mary and Joseph sought shelter after they had been refused admission to the inn "because there was no room for them."

The archaeologists now working at Bethlehem are not prepared to make any statement until all the remains have been uncovered and exhaustively studied. Experts free to make a statement, however, believe them to be on the eve of the greatest discovery ever made by archaeology.

Keeping Up With Others

idea Is All Right In Matter Of Progress

In one sense we must keep up with others. Their success inspires us. A student should not let another student outdo him! And the progressive ideas of other people often lead us to better ways of doing business, and to better methods of living. Keep up with good sensible people!

But many prosperous people at a bad example. They spend too much money on fine houses, and expensive dress and jewelry and automobiles. You may have enough to keep up with them, but I advise you to pay no attention to their example. Have simple habits. Live in your own way, according to your own taste, and well within your means. Remember, not all "high-flyers" are able to fly so high! "Up like a rocket, down like a stick!"

It is pitiful to see some poor people trying to keep up with foolish rich people! Everybody knows they are poor, and living beyond their means. They thus lose their credit and the respect of sensible people. Poverty is not a crime. No sensible rich man looks down on his poor neighbor—on the other hand, he has great respect for a sensible, industrious poor man!—J. P. Greene.

Lately Fills Her Column

The Editor of the Times-Democrat, Flemingsburg, Kentucky, who by the way is a woman, apparently is acquainted with the failings of human nature. At the head of the "Personals" column each week appears the following notice—"If you have visitors of whom you are not ashamed, report to this office."

Ancient Salvage

A project is on foot to recover the treasure on board the "Orient," one of the French ships that were sunk by Nelson in Abukir Bay, during the famous Battle of the Nile on August 1, 1798. It is estimated that there is about \$500,000 worth of gold and silver, part of the money seized by the French in raids on their way to Egypt.

The development of interest in historic sites and landmarks throughout Canada has increased greatly during the past few years, mainly as a result of the excellent work being carried out by the Department of the Interior on the recommendation of the Historic Sites and Monuments Board of Canada. The Board, which recently concluded its annual meeting in Ottawa, was formed in 1919 with the sanction of the Minister of the Interior, to advise the department on the preservation of such monuments and sites as were considered of pre-eminent national interest. Its chief objects in view were the education of the nation in the history of the country, the stimulation of patriotism, the commemoration of the deeds of those who have played a significant part in the exploration, defence and development of the country, and in addition the preservation as national property of sites having outstanding historical interest.

The first meeting was held in October, 1919, at the name "Historic Sites and Monuments Board of Canada" adopted. The Board, which is composed of eminent historians chosen with a view to having representation from all parts of the country, is honorary in character. The recommendations of the Board are carried out by the National Parks Branch, Department of the Interior, Ottawa. Up to the present time 190 sites have been marked with a standard bronze tablet approved by the Board.

Among the sites recommended for marking at the recent meeting of the Board are those of the first iron furnace in Upper Canada, at Lyndhurst, Leeds County, Ontario; the first submarine telegraph cable in North America, between Prince Edward Island and New Brunswick; and the fur-trading post of Norway House at the north end of Lake Winnipeg, in Manitoba. The inauguration of the first stage route between Quebec and Montreal, and the signing of the Canadian treaties made near Orillia, Ontario, are also to be commemorated.

The first iron furnace in Ontario was constructed at Furnace Falls, Township of Lanark, County of Leeds, by Wallis Sudbury in 1801, and was operated until 1812. The first submarine telegraph cable in North America was laid in November, 1853, by the steamer "Elen Gabor" between Cape Tormentine, New Brunswick, and Carleton Place, Prince Edward Island. Treaties made with the Indians in 1798, 1815, 1818, and 1819, which transferred to public control the ancient country of the Hurons lying north and west of Lake Simcoe, will be commemorated with a suitable marker at Orillia, Ontario. The importance of Norway House in the early history of Canada will be perpetuated with a marker reviewing the chain of events connected with the famous fur-trading post in Manitoba.

Believes Sun Spots Control Lake Level

Professor Finds Erie's Changes Follow Solar Cycle

Sun-spots control the level of Lake Erie, according to Prof. J. J. Nassau, observatory director of Cleveland, after a detailed study in co-operation with William Koski, graduate student. Lagging two years behind, the water level in the lake rises and falls with the 11½ year cycle of minimum to maximum to minimum intensity in the spots on the sun, Dr. Nassau's experiments showed.

The unusually high level of the lake in 1930 was due directly to the fact that the sun spots reached a maximum degree of intensity during 1928. Since 1930, the level has been receding annually and according to Prof. Nassau's observations, will continue to do so for at least two more years.

Wife: "I took great pains with that cucumber salad I made." Hubby: "So did I."

Client: "Your defences are much better than they used to be." Barrister: "Yes, I only learnt the art of defence after I was married."

Luftige Kolner Zeitung, Cologne.

WORLD HAPPENINGS
BRIEFLY TOLD

The Rothery dock, one of the largest on the Clyde, has been temporarily closed on account of decline of shipbuilding.

Dividend on the common stock of Canadian Pacific Railway for the first six months of 1932 is not being paid at present.

The Church of Scotland plans to build 30 churches in Scotland in the next seven years, 10 of which will be in Edinburgh and five in Glasgow.

Representatives accompanying the Japanese Olympic team plan to buy the cabin of each athlete from that country who wins an Olympic title.

Newton, Mass., one of Boston's wealthiest suburbs, has nearly 20 automobiles for every family. There are 14,000 families and 23,000 automobiles.

Florence Ziegfeld, New York theatrical producer, who died recently in California, bequeathed his whole estate to Billie Burke, his widow, and Patricia, their daughter.

An air-taxi was chartered from Imperial Airways by a London woman for a return flight to Chelmsford, Essex, where she placed a wreath on a grave in the churchyard.

Art and agriculture are the only creative professions in the world, says John Erskine, novelist. "By artists I mean all craftsmen who are creators," he said, "and by agriculturists I mean all those who produce and create wealth from the soil."

San Francisco's new \$50,000 opera house, the first and only municipally owned opera house in the United States, will be formally dedicated next month as a war memorial. It will open Oct. 15, with performance of Puccini's "Tosca."

Indicative, it is said, of an improved lumber outlook, is the protest filed with the British Columbia government by mill men against export of logs. Loggers, however, contend that they are in a position to satisfy all demands of the mill men as well as taking care of any export trade being offered.

Britain's Unemployed

Seven and a Half Million People Depending On Government Aid

A wandering army of unemployed youths, vaguely reminiscent of the United States bonus army, is making its appearance in Great Britain as a result of increases in the number of jobs announced as 2,811,792.

Unemployment has made approximately one-fourth of Britain's 45,000,000 population dependent to some extent on government aid, for fully 7,500,000 men, women and children are existing wholly or partly on government or local relief in addition to the official total of jobs.

As a result of the latest official figures, an increase of 64,438 in the month of July, and of 96,432 in the last year, the nation's relief machinery is scarcely able to cope with the situation.

Limit To Cattle Exports

Less Than 25,000 Head May Be Shipped To England Next Year

Less than 25,000 head of cattle would be shipped to the United Kingdom next year from Canada, even if the restriction now imposed against Canadian cattle landing in Britain were lifted. This estimate was made in an interview recently by Hon. Robert Weir, Canadian Minister of Agriculture.

Reports which have gone out that the lifting of the restrictions would result in Canada shipping from 100,000 to 400,000 head annually to Britain are regretted by Mr. Weir. These reports would tend to fill the British farmer with fear that his home market would be flooded by Canadian cattle, while no such danger really exists.

A material that does not stop the ultra-violet rays from the sun, resembling glass, and not as fragile, has been made from natural gas.

Barber: "Your hair is getting thin on top sir. Have you tried our new hair tonic?"

Customer: "No, it isn't that!"

Safe-breaker at home: "I should hate to open my own safe any other way."—Muskele, Vienna.

Make Interesting Discovery

Canadian Scientists Gain Knowledge Of Universe Of Great Importance
New knowledge of the universe, stated to be of tremendous potential importance in the scientific world, has been gained by Prof. J. B. Foster and Dr. A. Vibert Douglas, McGill scientists who returned to the university following a month's research work conducted at the Dominion Astrophysical Observatory at Victoria.

Professor Foster declined to claim full success for their achievements until he and Dr. Douglas have had time to re-study their findings. He said, however, that the results of their work would quite likely create an upsurge of opinion among European scientists.

The two McGill scientists set themselves to examine the electrical fields of stars.

They conducted observations both at Victoria and at Pasadena, Cal. Only one day was spent at the latter place.

Victorian Order Of Nurses

Miss Smellie To Visit Europe To Study Maternal Welfare Work

In recognition of the comprehensive programme of maternal welfare carried on by the Victorian Order of Nurses for Canada, the Rockefeller Foundation has extended to Miss Elizabeth Smellie, its chief superintendent, an invitation to visit a number of European countries within the next few months for the purpose of studying conditions of maternal welfare there.

Miss Smellie expects to sail early in September, visiting England, Denmark, Austria, Germany and Italy, and returning to Canada about the middle of December.

630

A SLENDERIZING MODEL THAT'S EASILY MADE

Body cuts in one unit! It joins the skirt.

It's cut on the wrap-over lines so becoming and liked. The box pleat effect at the front of the skirt is length giving, besides adding graceful width to the hem.

A small patterned crepe silk in dark blue and white is smart for general all-round wear.

Navy blue or black sheer crepe is exceedingly voguish. Make the vest of crisp white organdie. Leave it detachable so as to be readily removed for laundering.

White crinkle crepe silk, pale blue silk plique and clauque-plique are charming mediums.

Style No. 630 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 38 requires 4 1/2 yards 39-inch with 1/4 yard 25-cent contrasting.

Price of pattern 25 cents a sleeve or collar (not preferred). Wrap coin carefully.

WORLD'S RECORD WHEAT MOVEMENT MARKS WELLAND CANAL OPENING

Carrying 575,000 bushels of western wheat, representing the product of over 41,800 acres of prairie land and the largest single cargo ever carried in any single ship on any sea, the giant S.S. Lemoyne, of Canada Steamship Lines, 633 feet long and the biggest vessel on freshwater, opened the Welland Canal officially on August 6 in the presence of His Excellency, the Governor-General, Rt. Hon. Stanley Baldwin, and the delegates to the Imperial Conference, Premier R. B. Bennett, members of the Cabinet and thousands of spectators.

Largest Grain Carrier

Boat That Is the Pride Of Canada's Inland Waterways

World's largest grain carrier, holder of all Great Lake freight records and pride of the inland waterways, the S.S. Lemoyne of the Canada Steamship Lines fleet, officially opened the new Welland Ship Canal on August 6. Officiating at the ceremony was His Excellency the Earl of Bessborough, Governor-General of Canada, and delegates from all parts of the Empire attending the Imperial Conference in Ottawa.

Designed and built by Canada Steamship Lines at their own shipyards at Midland, Ontario, in 1926, the "Lemoyne" is considered a triumph of Canadian achievement and is the boast of Canadian shipyards. Since she first took the water she has captured all the major honors of the Upper Great Lakes freight carriers. Her records go even beyond freshwater for she has carried in single cargoes more grain and more coal than has ever been moved in any other single ship.

In 1929 the "Lemoyne" took on a cargo of 571,885 bushels of wheat, the crop of approximately 40,000 acres or more than 62 square miles of prairie land. In May 1930 she established a world record for the carriage of coal by taking aboard 10,558 tons and carrying it to Port William. It required more than 300 railroad cars to bring this cargo to the ship.

Six hundred and thirty-three feet long, with a seventy foot beam, a depth of twenty-nine feet and a registered tonnage of 10,480 tons, the "Lemoyne" will be by far the largest ship ever to have entered Lake Ontario and will clear the way for the carrying of the great bulk of the wheat crop of the prairies to the ports of the east by water. The "Lemoyne" along with other ships of her type will no longer be confined to the Upper Lakes; her eastern terminus becomes Kingston, Ontario, and her east to west cruising radius more than one thousand miles.

During the last twelve months the Welland Canal has seen a series of new records established. Last year the S.S. Noronic, upper lake passenger liner and flagship of the Canada Steamship Lines, northern fleet, established the first of the series of records when she made her first voyage into Lake Ontario and visited the ports of Toronto, Hamilton and Kingston for the first time. On that occasion over one hundred thousand people from these three cities went on board the "Noronic" and the walls of the canal were lined with thousands of people during her historic cruise. The "Noronic" at that time was the largest vessel of any type to go through the canal and remains the largest passenger steamer to have entered Lake Ontario. Her length is approximately half of that of the "Lemoyne."

Following the establishing of this record by the "Noronic," giant upper lake freighters of the Canada Steamship Lines set three new marks for the canal in a little over a week. Early in July this year the freighter "Ashcroft" went through the canal with 500,000 bushels of wheat on her way to Kingston only to see her record broken within a few days by the freighter "Glenaele" with 580,000 bushels. Both these vessels had formerly been confined to the Upper Lakes.

Less than a week after the "Glenaele" had set her new record for grain she returned to Lake Erie and brought down to Hamilton 12,810 tons of coal, another Welland Canal record which will likely stand for some time. On her latter trip the "Glenaele" also shattered all records for cargo carried into the port of Hamilton.

Today the "Glenaele" is the largest boat ever to have entered Lake Ontario, but compared to the "Lemoyne" she is a small freighter. Her length of 596 feet compared with the "Lemoyne's" 633 feet and her capacity is approximately 380,000 bushels compared with the "Lemoyne's" 571,885 bushels.

Considered of special importance to the Empire since the Welland Canal in future will be the route used by most of Canada's grain ships, it was decided some time ago that the official opening should be on the programme of the Imperial Conference and efforts were immediately made to have the largest Canadian lake boat go through for this ceremony.

Elaborate preparations were made for welcoming the "Lemoyne" to Port Colborne on her first voyage and that in addition to delegates, government officials and representatives from other provinces large crowds of people viewed the ceremony.

Oldest In The World

Ancient Skull Is Found While Excavating In London

The oldest known human skull brought to a London woman, G. Elliot Smith, professor of anatomy at the University of London, stated at a meeting of the International congress of pre-historic and proto-historic sciences.

"The skull is known as the Lloyd's skull," he said, "and was found in blue clay 40 feet below the surface during excavations for the new home of Lloyd's corporation in Leadenhall Street. It belonged to a woman about 50 years old, who probably was left-handed."

After considering all the evidence and carefully studying all other known skulls of the kind, Professor Smith, he decided the London skull represented the earliest genuine remains of homo sapiens, giving it pride of place over the Java man, the Peking man, and all other pre-historic finds.

The other attendants at the congress expressed great surprise over the announcement and left the hall immediately afterward to examine the skull and discuss the problem.

Do you keep your money in an outside or an inside pocket?" asks a male fashion writer. No.

CHEEF: "De prisoner hab had him appendix removed, Sare." CANNIBAL KING: "Curse! I hab an appendix."—From The Humorist, London, England.

Naval Armaments

Difficult To Distinguish Between Defensive and Offensive Weapons

Why all this bother about "offensive" and "defensive" naval weapons at Geneva? In the submarine offensive? Are battleships, mine-layers and bombing planes defensive?

There is one simple rule by which every case can be decided: The other fellow's weapon is extremely offensive, your own is purely defensive.

Ask any schoolboy or baseball fan. Are battleships, mine-layers and bombing planes defensive?

There is one simple rule by which every case can be decided: The other fellow's weapon is extremely offensive, your own is purely defensive. Ask any schoolboy or baseball fan. Are battleships, mine-layers and bombing planes defensive?

MONARCHIST REVOLT IN SPAIN IS SHORT-LIVED

Madrid, Spain.—Rioting mobs in Seville took their vengeance on monarchist sympathizers for the short-lived revolt against the Republic, which collapsed when its leader, General Jose Sanjurjo, fled the city and was captured while trying to get to the border.

While the rioters were burning buildings and bombing homes in Seville, the government proceeded with "mopping up" operations against the revolutionaries and the rest of Spain gave itself over to public celebrations in honor of the young republic's hardihood in its first great test.

General San Jurjo, who complained that "everybody abandoned me and my undertaking," was on his way to Madrid from Huelva, where he was arrested after he had asked a rural guard to show him the best way to Portugal.

President Niceto Alcalá Zamora presided over a lengthy cabinet session at which the punishment for the rebel general was discussed.

Nine buildings were burned by the Seville mobs. Among them were the offices of two newspapers—the A.B.C. and La Unión—and the church of San Lidefonso.

The rioters killed a civil guard near the Seville jail, which they attacked in an effort to liberate prisoners and to assault members of the civil guard held captive there because of participation in the revolt.

Shortly afterward, Premier Manuel Azana announced the general and all other officers and civilians connected with the revolution would be tried by the sixth section of the supreme court. This tribunal is devoted to military affairs.

The premier said he intended exterminating to the very roots the cause of the rebellion. "It would be unjust to those persons availing themselves on charges of section if the government allowed such crimes to continue," he said.

General San Jurjo, who complained that "everybody abandoned me in my undertaking" after his revolt collapsed, was questioned lengthily at police headquarters here.

Wheat Carry-Over

Slight Decrease Is Shown Compared With Previous Year

Ottawa, Ont.—The carry-over of wheat at the end of the crop year July 31, was 130,948,963 bushels, compared with 134,078,963 last year, the Dominion Bureau of Statistics reported recently.

Canadian wheat in elevators and afloat in the United States amounted to 4,706,828 bushels, while 1,181,427 bushels of Canadian wheat were afloat destined for United States ports. The comparable figures for these items at July 31, 1931, were 5,638,334 and 1,259,978 bushels, respectively.

The total amount of Canadian wheat in Canada and the United States at July 31, 1932, was 136,857,166 bushels compared with 140,577,275 bushels at July 31, 1931.

The final revision of the 1931 wheat crop estimates is not possible until January, 1933, when the final figures for deliveries and platform loadings are made available by the Board of Grain Commissioners.

Floods Take Heavy Toll

Hundred Thousand Chinese Homeless and Many Lives Lost

Harbin, Manchuria.—A hundred thousand Chinese residents of Harbin were forced by unprecedented floods to abandon their section of the city, which has become a vast inland sea. Approximately 3,000 persons were reported missing in the valley of the Blanghah River, which has risen far above the level in 1914, when Manchuria experienced the worst flood in its history.

Harbin's Chinese residents have congregated in cemeteries and fields on the outskirts of the city. Many of them are without food, clothing and shelter.

Cholera is spreading in the district and the people are hoarding food as prices skyrocket.

May Finance Settlers

St. Catharines, Ont.—Possibility of 10 unemployed families of this city becoming pioneers of the Peace River district was seen if plans of the city council are completed. Under the proposal 10 families, financed with a maximum sum of \$600 each, provided by the municipal, provincial, and Dominion Governments, would be established in Peace River.

W. N. J. 1865

No Dairy Shipments

Lack Of Refrigeration Service May Prevent Exports Over Churchill

Montreal, Que.—Owing to the high rates that would have to be charged, little hope is held out that a refrigeration service will be available out of the port of Churchill, Man.

At least this year, Thomas Harling and Co., steamship agents here, stated recently.

Efforts had been made by western Canadian interests to obtain steamship service from the new northern port for dairy produce, the company stated, but it was felt the rates would be too high to attract shippers. Vessels at present using the Hudson Bay route to carry grain do not have the refrigeration facilities necessary.

Western Canada last year shipped a considerable quantity of butter to the United Kingdom, when exports of that commodity were resumed after lapse of several years. Certain quantities of eggs and poultry are also shipped overseas by the west, the shipments being made via Montreal.

On the On-to-the-Bay Association had little comment to make on a Montreal despatch, saying it would be practically impossible to ship dairy products from Churchill this year owing to prohibitive rates. They regarded the statement as indicative of the difficulties encountered in developing the new route. Ample dairy produce was available in the west for export to ensure profitable operation of a refrigerated ship on a reasonable freight rate basis, it was stated.

Double Taxation

Steps Being Taken To Remedy Grievous Situation

Edmonton, Alberta.—Recommendations from the conference of income tax officials of the four western provinces, which was held here, will go in course to their respective governments, certain general principles and working methods having been agreed upon for joint adoption if approved. It is expected that the changes will be made to apply to next year's tax.

Provincial income taxes as affecting wage-earners are the chief point on which some changes in the present system are desired. The superintendents of the four provinces are trying to find a way of avoiding the taxing of the same income twice. A number of cases were found in this year's operations of persons living in one province and working in another, and under the income tax laws as they stand at present the incomes of such persons are liable for taxing purposes in both provinces. This overlapping and double taxing will be remedied, it is understood, if the suggestions of the superintendents' meeting are adopted.

Research Laboratories

Two Thousand Guests Attend Official Opening At Ottawa

Ottawa.—The handsome, bronze doors of Canada's new national research laboratories swung open to 2,000 guests from the British Empire. Between the doric columns of the building, the doors of the half-a-hundred windows.

His Excellency the Governor-General faced one of the most distinguished audiences in Canada as he pronounced the words declaring the building formally open.

Hon. H. H. Stevens, Minister of Trade and Commerce for Canada, presided. Speaking briefly, he called upon the Prime Minister, Rt. Hon. R. B. Bennett, to address the assembly. After a short address from Mr. Bennett, his excellency, upon whom fell the duty of declaring the building open, spoke.

Quest For Blondes

Scientists Require Golden Hairs For Recording Humidity

Montreal, Que.—The McGill University weatherman's quest for blondes whose tresses reach their waists brought quick response Wednesday. Telephone calls assured him there are still women in Montreal with hair unbobbed and who are willing to sacrifice a few hairs of it on the altar of science.

The McGill meteorologist requires the fine, sensitive, golden hairs for a hygograph, a delicate instrument used for recording humidity changes from hour to hour. The hair of brunettes is too coarse.

Should Attend Unveiling

St. Thomas, Ont.—Representation of the Dominion of Canada by a composite battalion of great war veterans at the unveiling of the Canadian memorial at Vimy Ridge, which may take place next year, was recommended by Cpl. Hercule Barre, Canadian trade commissioner to France.

Kaye Don Will Race Again

Britain's Speedboat Racer Has Hope Of Capturing Trophy

London, Eng.—Kaye Don, Britain's speedboat racing idol and holder of a new world's record upon the water, left here for Southampton to sail on the steamer "Majesty" for Detroit, where he will race against Gar Wood for the Harmsworth trophy.

A large crowd of cheering admirers bade him farewell. "I am making no promises," he said, "except this—I will do the best I can against Wood's boat, which has a much greater horse-power than my Miss England III."

By promising to do the best he can, Don meant he would try to reach again on the new Detroit course the two-mile-a-minute pace he set when he slashed his sleeked power plant across Loch Lomond at an average speed of 119.51 miles an hour, with a top mark of 120.5 miles, the fastest any human has travelled over the water.

CANADA'S SHARE OF BRITAIN'S WHEAT IMPORTS

Ottawa, Ont.—During the calendar year 1931 Russia supplied the United Kingdom with 24.24 per cent. of its total wheat requirements while Canada's percentage was slightly higher at 23.12. These figures were contained in a special report on world trade in wheat, issued by the Dominion Bureau of Statistics, especially for the benefit of the Imperial Economic Conference. Russia's total exports of wheat to the United Kingdom in 1931 amounted to 54,010,298 as compared with total Empire imports to the United Kingdom of 94,948,376.

The total wheat requirements in 1931 of the United Kingdom, chief wheat importing country of the world, amounted to about 223,000,000 bushels. This was supplied mainly as follows: Canada, 51,562,000 bushels; Australia, 43,307,000; British India, 899,100; Russia, 54,010,298; Argentina, 38,701,714; United States, 15,576,000; Germany, 4,283,000; France, 35,000; and other foreign countries, 9,875,000.

Russia's upsetting invasion of the Empire wheat market came in the last two years, the total to the United Kingdom for 1930 having been only 34,939,000 bushels, while the five-year average ending with that year was 8,783,000 bushels. This compares with a five-year average over the same period of 78,194,600 for Canada. Estimated gross average yearly British exports of wheat for the five years ending with 1930 amounted to 330,166,000 bushels. Canada which leads all wheat exporting countries had an average total of 257,863,000 bushels.

Estimated average world exports during the same period totalled 692,649,000 bushels. Argentina led among the foreign countries contributing to this total with an average of 149,785,698 bushels, with United States, Hungary, Algeria, Germany, Rumania, France and Russia, following next in order. Russia's average was 31,968,300 bushels.

Alberta Delegates

Edmonton, Alberta.—Hon. George Hoadley, Minister of Agriculture, and Dean Howes of the university, will be the Alberta delegates to the meeting called by Hon. Robert Weir, federal minister of agriculture, for August 29 in Toronto.

ADDRESSES SEED GROWERS

Under the auspices of the Canadian Seed Growers' Association, Field Days are being held this month at various points throughout Saskatchewan. Mr. H. S. Vigor, Secretary of the Saskatchewan Branch of the Association (shown above), will be one of the principal speakers.

War Loan Conversion

British Plan Is Attended With Success According To Report

London, Eng.—The success of Great Britain's war loan conversion is strikingly illustrated in the official report of government revenue and expenditure for last week, from which it is inferred that nearly \$1,600,000,000 out of the total of \$2,084,994,000 was converted by July 31.

The report includes an item of expenditure, "cash bonuses, \$15,703,000 sterling." When the government announced its conversion scheme on June 30, where five per cent. securities could be exchanged for a 3½ per cent. issue, bondholders were offered a cash bonus of £1 for each £100 if they gave notice of intention to convert before July 31.

While no official announcement of the progress of the scheme was issued, London financial houses were quick to observe the cash bonus item, multiplying it by 100 to find the figure converted in July.

Wheat For Italy

Shipment Being Forwarded Direct Through Port Of Churchill

Winnipeg, Man.—A shipment of wheat will go to Italy this summer direct from the port of Churchill. Thomas Harling, Sr., head of Thomas Harling and Son, shipping agents, made the announcement here just before he left for the northern port to superintend the loading of the first two ships of the season, the "Pennyworth" and "Blentworth."

Mr. Harling said the chartering of a vessel for the shipment to Italy indicated the Hudson Bay route was appealing to continental importers as well as to Great Britain. The vessel would carry the first cargo to go direct from Churchill to the continent. The three vessels already chartered will carry about 150,000 bushels of wheat.

Enlarging Elevator

Winnipeg, Man.—The United Grain Growers, Limited, have awarded a \$250,000 contract to the Northern Construction Company, of Vancouver, for the extension of their elevator there to a capacity of 2,000,000 bushels, the work to be completed by November 1, according to an announcement of R. S. Law, president of the firm. The present capacity of the elevator is 1,600,000.

Increased Acreage

Prairie Provinces Have More Than Million More Acres Under Crop This Year Than Last

Ottawa, Ont.—The prairie provinces have 1,042,278 more acres under wheat this year than last, according to a crop report issued by the Dominion Bureau of Statistics Wednesday, August 10.

For all Canada, the increase is 984,350 acres.

"The estimates of the areas sown to the principal grain crops in the three prairie provinces as shown by the annual statistics collected in June last through the rural schools are now available. The figures reveal an increase of 1,042,278 acres (four per cent.) in wheat, and 221,033 acres (27 per cent.) in oats, with slight decreases in barley and rye and a rather drastic reduction of 28 per cent. in flaxseed acreage from 618,361 to 445,700 acres.

Menace To Health

Dental Authority Says Sugar and White Flour Injurious To Teeth

Toronto, Ont.—The corner candy store is a greater menace to public health than the old corner saloon, according to Dr. Martin Dewey, New York, president of the American Dental Association.

Asked for an interview during the dental convention he is attending here, Dr. Dewey said, "Just say this—it has been said a million times but it will stand plenty of repetition—white flour and white sugar are the big enemies to the teeth of civilized peoples. These are the culprits which are responsible for more ill-health as far as teeth are concerned than any two articles you could mention."

PREFERENTIAL TARIFF ASSISTS EMPIRE TRADE

Ottawa, Ont.—Preferences granted by Canada to Empire countries amounted to \$30,000,000 during the year ended March 31, 1931, according to the preliminary trade report just issued. This was estimated as the difference between the duty collected under the preferential tariff and what would have been collected under a general tariff. The difference between the preference and treaty tariffs would have been six million dollars less.

Total Empire imports for the year under the preferential tariff amounted to \$141,088,156. The duty collected amounted to \$18,125,220, at an average ad valorem rate of 13.5 per cent. The estimated duty for this volume under treaty tariff would have been \$42,940,880, and under a general tariff \$49,202,030. Of the total imports goods valued at \$37,151,606 entered Canada free.

The great bulk of these imports came from the United Kingdom, the total being \$95,365,805, of which \$18,288,442 represented free imports. Duty collected on United Kingdom imports amounted to \$15,457,744.

Under a treaty tariff this would have been \$23,737,060, and under a general tariff, \$28,982,152.

The next largest importer to Canada, the British West Indies, sent goods valued at \$13,583,152, of which \$8,745,705 was dutiable, bringing a revenue of \$1,366,476.

Under a treaty tariff this would have been \$7,072,931, and under a general tariff, \$7,147,446.

PROPOSAL MADE TO ESTABLISH EMPIRE BANK

Ottawa, Ont.—Establishment of a super-central empire bank, represented in each participating country by a local office, was advocated by J. F. Darling, director of the Midland Bank of England, and well-known authority on silver.

The bank, Mr. Darling states, would commence operations with a fund of approximately 100,000,000 pounds allocated to each participating country as agreed upon. This fund would be increased annually by three per cent. over the preceding year. In a memorandum on an imperial co-operative credit and silver, followed up by a newspaper interview, Mr. Darling went into his proposed plan. It was taken for granted, he said, that within the empire there existed a potential but unused credit, which, through co-operation, might be utilized to great mutual advantage. To operate this credit most effectively, the super-bank should be set up.

An Island Prison

Sons Of Freedom Are Being Established In New Quarters

Vancouver, B.C.—A little green island in the Gulf of Georgia became prison Thursday, August 11, to 20 Sons of Freedom who for the first time saw the place where they must spend the next three years. They were sent over from Vancouver and will be followed by similar groups under the same body of 600 nude paradars as settled in their place of confinement. In the meantime, some 300 of their children will be cared for in provincial institutions.

Instead of spending the winter on their well kept Balmus island seashore and snow in the southern interior, the Dookhobors will winter amid the soft rains of the mild coast country. They will be housed in newly-built quarters surrounded by barbed wire ten feet high and may pursue their occupation of farming to some extent—the men on one side of the island, the women on the other.

Jobless Veterans Offer Services To Bolivia

British Soldiers Would Join In Fight Against Paraguay

London, Eng.—Many unemployed war veterans called at the Bolivian legation and consulate general here in response to an announcement of the British Fascist that a large number of British Fascists were anxious to join the Bolivian army in its dispute with Paraguay. They were courteously informed, however, that recruits were not needed at present.

The consulate-general said it had received hundreds of letters from men desiring to offer their services, in addition to a "British Fascist" offer of 10,000 men if necessary.

Optimistic At Eighty

Man From Ontario Quite Confident Of Finding Wife

Winnipeg, Man.—Flat broke and 80 years of age, an optimistic traveller arrived in Winnipeg from Bracebridge, Ont. He visited the city hall and said he had ridden bumpers here in several years. At the harvest fields. He was not exactly looking for a meal ticket at the city hall, he said. He just wanted to look in and talk to some of the folks.

A blacksmith by trade, he said he had never missed a meal in his life and did not expect to. He was sure he'd find something to do in the west after the harvest.

Prospectors Going North

Rush Started With Report Of Manitoba Gold Strike

Norway House, Man.—Reports of a promising gold strike on the northwestern extremity of Elk Island are seeping in to this northern Manitoba outpost. A number of prospectors are joining in the rush from Inland Lake and other mining men are making their way to the scene of the find by aeroplane.

The gold occurs in a telluride in a sheared zone about 16 feet wide and parallels the direction of the island. Elk Island is approximately 150 miles northeast of here.

Radio Cars For Police

Vancouver, B.C.—For the past two months the Vancouver city police department has experimented with radio equipped automobiles and a short wave sending station located at police headquarters. Some 20 cars have already been put in service and police officers working the experiment has proven satisfactory.

WHERE A NOTED WARRIOR RESTS

The grave of Field-Marshal Lord Plumer in Westminster Abbey, showing four cushions on which are placed his insignia. Lord Plumer's remains lie close to those of the "Unknown Warrior." The tablet shown at the left back-grounds reads in part: "To the Glory of God and to the Memory of One Million Dead of the British Empire who fell in the Great War of 1914-1918."

To Check Criminology

Scientific Treatment Of Delinquency and Crime Inaugurated In England

A significant and encouraging movement has recently been launched in England in an effort to combat crime at its source. This movement is under the auspices of the Association for the Scientific Treatment of Delinquency and Crime, and has for its ultimate aim the founding of a National Institute for the prevention of crime.

There can be no question that the treatment of first offenders and of young criminally-disposed persons has much to do with the creation of the crop of criminals and the formation of habits and crime. To overcome the criminal tendencies of hardened criminals is admittedly a vast task. But, but this effort in England would appear to have in it the elements of hopefulness in that it strives to rescue the young person who is about to start out on a criminal career. Too much in the past it has been true that young people guilty of lapses against the welfare of society have been sent to prison when they might have been otherwise dealt with, and in prison have acquired confirmation and hardening of their tendencies until they have emerged as man and woman with their hands against society and with society's hands against them. In this effort to which we have alluded it is intended that there shall be clearing stations, at which first offenders would undergo physical and psychological examination, and then be given treatment in clinics or re-education centers, without loss of freedom or stain upon reputation. In this way it would seem likely that many will be saved from a life of crime to useful citizenship.

Along such lines it would appear that there would be genuine likelihood of preventing the drain upon society's resources involved in the imprisonment of criminals, at least a certain proportion of whom would be re-established in good living. The experiment deserves all encouragement and is backed in England by great names of scientists and public men.

This experiment overseas should be observed by our Canadian authorities who have power to deal with the prevention of crime.—Regina Leader-Post.

Monkeys Are Neither Biped Or Quadruped

Four-Handed Like Bridge Game Says London Customs Board

How many feet has a monkey? The question arose when a shipment of six of the chattering primates arrived at Folkestone from the continent. British tariff law admits quadrupeds without duty; other animals are taxed.

"Monkeys have four feet," the London firm whither the simians were consigned argued.

"No," ruled customs agents, "they have two feet and two hands"—so they were taxed as bipeds.

Protesting against H. M. Customs agents' deficiency in zoological knowledge, the consignees appealed to the board of customs in London.

This sage board confounded them all: "None!" Monkeys, they affirmed, are quadrumanus (four-handed, like a bridge game).

So the poor monkeys haven't a foot to stand on, and neither has the appellant.

Wood-Pulp Production

Over three-quarters of the wood-pulp produced in Canada in 1930 was manufactured and used in mills which use their own pulp for the production of paper. About twenty-one per cent of the total quantity of pulp produced was made for export.

One thing that always has puzzled us is why these trim simians that "cure" dandruff, etc., etc., with a "single application," come in such large bottles.

In Oregon a loser in a gambling game can use the winner and recover double the amount he lost.

"Come down, boys, I am ashamed of you."

"You needn't be. We shall reach the top all right."—Elegante Blaster, Munich.

W. M. T. 1930

Branded Beef

Sales Of Well-Finished Beef Have Been Greatly Boosted

The current issue of the Livestock and Meat Trade Review, prepared by the Dominion Livestock Branch at Ottawa, supplies some striking figures with respect to the extent to which sales of well-finished beef have been boosted through branding as provided under the federal beef grading service.

For the first four months of 1931, sales of branded beef are reported as totalling 5,032,396 pounds, while for the first four months of 1932 the total is 7,047,396 pounds—an increase of 2,014,999 pounds, or 40 per cent. Another way of presenting the same figures is to transcribe this increase into terms of head of beef cattle, which, allowing an average dressed weight of 600 pounds each, amounts to 3,352 head.

It is also of interest to note from this report that the volume of beef branded in Quebec packing-houses, chiefly in Montreal (1,420,017 pounds), is nearly two-and-a-half times the amount branded during the first four months of 1931. This figure, however, does not begin to represent the actual volume of branded beef now being sold in Montreal as a great deal of the Montreal supply is dressed at Toronto and Winnipeg stockyards. Officials of the beef grading service estimate that about 30 per cent of all the beef being branded finds a market outlet in Montreal. This places the Montreal figure at upwards of 2,100,000 pounds.

Every province in Canada in which beef is branded shows an increase in volume over last year, the largest increase in grading, outside of Quebec, is in Manitoba, which shows a gain of around 500,000 pounds during the first four months of the current year.

Movie Wind Machine

Combats Brush Fires

Is Capable Of Putting Out Small Fires

Blowing out a brush fire as easily as a person might snuff out a match, a powerful wind machine, developed for a Hollywood motion-picture studio, has been used successfully in combating forest fires by the Los Angeles county forestry department.

Tests proved that the machine is capable of putting out any small blaze quickly, best results being obtained when dirt and sand were shoveled into the stream of air from the propeller, thus smothering the flames.

The wind machine may be particularly valuable where no water is available and, if mounted on a tractor, could be taken into heavily overgrown territory, says Popular Mechanics Magazine. It is also proposed to direct the blast of air through a funnel-like nozzle and, with the compressed air, blow out by the roots brush and dry grass to cut fire breaks.

Recipe For Keeping Young

Be Keenly Interested In Everything Says Henry Ford

Henry Ford at 60 believes that if he continues to "keep interested in everything," old age will not bother him.

Celebrating his 60th birthday a few weeks ago, he said he believed that "people whose interests are up to date will get along in the world," without growing old.

"We like to have people think we get better as we get older," said Mr. Ford, "and I believe people of these times have more varied interests to keep them young."

The motor manufacturer expressed the belief that business conditions will gradually improve as people do more for themselves and cease looking to the Government or some Santa Claus for aid.

Winds Get Their Turn

Recently the last river mail boat on the Mississippi closed fifty-years of continuous service between Memphis and Mayfield, Tenn. The same day a post-office bulletin called attention to the fact that 12,000 pounds of mail had been sent via air during the first year of air mail at Memphis. The waters receive a well-deserved rest, but the winds are just beginning to work.

"I have only ten minutes and I hardly know where to begin," said the speaker.

"Begin at the ninth minute," shouted a bored man in the back of the audience.

Young lady wants to know why a young man who is attentive to a girl is called her suitor. He is called her suitor because he may or may not.

Manitoba had 165,000 sheep at the end of last year, Saskatchewan had 200,000, and Alberta, 614,000. Total 969,000.

Magicians Of The Past

Showmen's Illusions That Mystified Crowds Of A Former Generation

Many of the most renowned magicians, who entertained crowded theatres in the last century and the earlier years of the present one, were inventors of no mean ability. Kellar, Hermann the Great and, later, Thurston made the machinery which they employed in the most puzzling of their illusions. Thurston spent years in perfecting the "Leviathan Lady," in which a young woman appeared to be suspended in the air.

The trick of the speaking head, in which the head of a girl, severed from the body and floating in space, continued to carry on conversation, took years to bring to complete success, yet it also was of simple construction. Magicians are a clanish lot, and they keep as secret trusts their own secrets and those of members of their guild. That these secrets become known to the world is not because they are intruded to the Patent Office, but because some one eventually proves as smart as the inventor.

One of the striking features of a travelling show in the '90s was the "Talking Automaton," a wax figure in a glass case that answered questions and solved mysteries. It was the show's most successful attraction and brought down the wrath of a competing combination which referred to it as a "ventriloquist's fake." If the contriver of the trick really had discovered, as he claimed, the "secret of artificial speech" he might have shared honors with Edison. What he did was to conceal a dwarf between the two layers of the floor of the case and make him the mouthpiece of the trick.

One of the illusions of another magician of the age was to raise a flaming wand and cause the ceiling of a theatre to blaze with "luminous stars of the firmament." He was chemist enough to know the value of potassium as a showman's helper. Magic has lost much of its vogue as an entertainment. Science does on a grand scale what the magician did as an exhibition of mystery. Compare the talking automaton with the phonograph or the radio; compare bespangling a room by phosphorescent spots with touching a key flashing hundreds of thousands of lights into being a hundred miles away. The man of magic finds that he belongs only to his time, and that is of short duration.—New York Sun.

Grain Storage Facilities

Saskatchewan has 8,229 country elevators with a total capacity of 103,162,550 bushels, and two interior grain storage elevators which will hold 11,000,000 bushels. Private elevators in the province hold 4,500,000 bushels.

A youngster in school was asked: "Where are elephants found?"

"Elephants are so large that they never get lost," was his answer.

And that could apply to the advertising business without stretching one's imagination too much.

She: "We've been waiting a long time for my mother."

He: "Hours, I should say."

She (rapturously): "Oh, George!"

RADIO ANNOUNCER

Bill Hay, the popular announcer of Amos and Andy enjoying the sunbath and fresh air (without the famous tascab company) at Victoria, British Columbia.

Calendar Is Left Behind

Father Time Springs Ahead Six Hours Every Year

Every leap year laymen and scientists alike have the opportunity of watching the efforts of the calendar to catch up with Father Time. Once in four years our antiquated calendar must somehow gain a day to make up six hours lost each year. This it does partially by adding a day on what we know as Leap Year. Still the calendar does not quite catch up in the race. There is still eleven minutes and fourteen seconds left unaccounted for each year. Thus there exists centennial leap years, where another day is added. These Leap Years, now almost forgotten, are those centuries exactly divisible by 400. Three out of four centuries years, 1700, 1800, and 1900 are common years, but 2000 is a Leap Year. This plan matches the solar year within twenty-six seconds.

Receives New Title

New title has been added to the already imposing list of the Prince of Wales; that of Commodore. He consented to become Commodore of the Royal Thames Yacht Club, which is the second oldest club of its kind, Lord Queensborough retiring to make way for him.

Conductor—"Can't you see the sign, 'No smoking'?"

Sailor—"Bure, mate, that's plain enough. But they's so many dippy signs here. One says, 'Wear Nemo Corns.' So I ain't pay'n' attention to any of them!"

Doctor: "Now, before I examine you, may I ask what you drink?"

Patient: "Thank you, doctor. A small whisky and soda for me."

Paint exposed to the weather ordinarily lasts about five years.

Italian Heir Likely To Receive Fortune

Case Has Been In Courts For Sixty-Five Years

To inherit a million in money left by an ancestor 323 years ago does not fall to the lot of every man.

But this is the happy end of a case which the courts of Italy have been trying since 1867 and it seems that a certain Giovanni Trombetta, postal clerk at Milan post office, gets the lion's share of the fortune after living 45 years in a very modest way. In the year 1600 Baron Antonio Trombetta, who had vast funds at Montebello Jonico, in Calabria, left them all in trust to neighboring Capucine monks, founded an abbey for them and gave them his farm buildings too. It seems that the baron had quarrelled with his family, which consisted of a mother who had married and her two sons by her second husband.

When, in 1668, the monasteries were to a great extent secularized, the baron's fortune, which had increased a hundredfold, was not claimed by his kin, and the Italian government, according to law, took possession of it.

Then the descendants of the baron's half brothers, who had grown poor, and come down to the humblest classes of society, appeared and made their claims. Of these there were 70 persons, but the courts weeded them out to 40 and now the chief heir is Giovanni Trombetta.

The money will soon be handed over to him, but the state kept a considerable portion of the whole estate which was being carefully nursed by the Abbots at Montebello Jonico for what today, after 160 years, is the benefit of a poor postal employee.

Educated In Many Places

Daughter Of U.S. Consul Has Done Much Travelling

Mary Marsh, daughter of the United States consul at Sydney, Nova Scotia, should be internationally minded. She has taken her travelling between terms at school, but in the stereotyped manner of students on cut-and-dried world cruises. Miss Marsh was born at Manila, Philippine Islands; attended grammar school at Ottawa, high school in the United States, was privately tutored in Mexico, attended a ladies' institute in Montevideo, Uruguay, and graduated from high school in Sydney. She then entered Dalhousie University, for two and one-half years of interrupted attendance. But she will graduate from the University of Strasbourg, Germany. Her father, O. Gaylord Marsh, has been appointed to the consular post in that historic city.

A novel clock in a South American city is in the form of a searchlight. The clock, in revolving, falls on a different landmark every hour.

Nearly two-thirds of the artificial flowers exported into the United States last year came from Germany.

Only about one American male out of every 200 attains a height of six feet.

Paint exposed to the weather ordinarily lasts about five years.

All-Canadian Highway

Completion Is Expected In About Two Years' Time

Preaching the gospel of the vital need of good roads, everywhere in Canada, Samuel L. Squire, Toronto, chairman of the Canadian Good Roads Association's executive committee, visited Edmonton recently returning from the Pacific coast.

"In two years' time Canadians will be able to travel across the Dominion on an all-Canadian Highway with the exception of a short break for the lake journey, from Fort William to the Soo," Mr. Squire said. "It has been a tremendous task, cutting through and preparing the highway in northern Ontario, particularly from Kenora on to Fort William. But progress is being made."

Mr. Squire told of the great aid given the association by governments in all the provinces. Recently, too, Newfoundland has joined the organization. Everywhere the necessity of preparing good roads, for the comfort and pleasure of the tourists, is apparent, declared Mr. Squire.

"Co-operation is undoubtedly the big need today, not only between the various provinces of Canada, but between the urban and rural sections," declared the good roads advocate. "Time was when a farmer, driving to the city, was referred to by some as a 'chuck.' At the same time when a city fellow went to the country, he was a 'dude.'"

"It's different now. With good roads leading right to the farm doors, the farmer is just as familiar with city affairs as the citizen and the people living in the cities are just as familiar with conditions in the country."

Vancouver Grain Storage

Building Big Addition To Elevator Capacity To Take Care Of Grain Trade

An important addition to Vancouver grain storage facilities has been decided upon and elevator capacity will be increased to the extent of 1,475,000 bushels. The cost involved in this addition to elevator capacity will be about \$375,000, and the work will be based on that the new accommodation will be ready to receive grain early in October. This port will then be able to store more than 17,000,000 bushels at one time.

In recent years, with millions of bushels of grain pouring out of Al-berta and the Okanagan, Vancouver terminal has at times been so congested that westbound traffic has been restricted.

The movement of Canadian wheat through the port of Vancouver has been a comparatively recent development, but has grown to very large proportions. Whether the opening of the new route via Hudson Bay will have any appreciable effect upon west-bound shipments remains to be seen.

It is also announced that a shipment of 4,000 tons of wheat will leave this port at an early date for delivery at Vladivostok. A few months ago several million bushels of western grain was shipped from Vancouver to the Russian port.

Pendulum Observations

Pendulum observations by the Dominion Observatory, Department of the Interior, show that the mountains of British Columbia are buoyed up by abnormally light material extending down into the earth's crust for about sixty miles. The excess of gravity revealed by the pendulum on the prairies is believed to be due to an extensive underground of abnormally heavy rock.

Millionaire Rag Picker

William H. Kearns, Chicago, in life an obscure rag-collector, died a millionaire. This was revealed when a brother and sister died a \$2,000,000 bond pending dispositive of the estate. Kearns, who died intestate at the age of 70, left stocks and bonds amounting to \$1,000,000.

Greece plans to construct 2,100 miles of new highways.

"I should die of boredom doing nothing all day."

"Oh, you never did have much perseverance."—Hummel, Hamburg.

QUEBEC'S CLEAR SKIES FAVORABLE FOR OBSERVATION

"This is just the kind of sky we want to observe the eclipse satisfactorily," Sir Frank Dyson, Astronomer-Royal, and other British astronomers and scientists, told reporters when they arrived at Quebec on the liner "Montcalm." They have come to Canada to observe the total eclipse of the sun at various points in Quebec and New England, and are divided into four separate parties, going to Magog and Farnham, Quebec Province; and Berlin, New Hampshire, and Mattotcks, Me. The celebrated astronomers are seen pointing to Quebec's clear sky. The group included Sir Frank Dyson, leader of the Royal Astronomical Society's Expedition (left, pointing); J. F. Cameron, Royal Physics Observatory, Cambridge; Prof. J. F. M. Stratton; and Prof. H. Dingle, of the Imperial College of Science and Technology.

For Creamed SOUPS and SAUCES

If you have not tried St. Charles Milk you will be surprised at the improved flavor it gives to cream soups and sauces. It is handy and economical too and with it you can make hundreds of tasty dishes that you and your family will enjoy.

Always ask for St. Charles by name and then you can be sure that you are obtaining the finest evaporated milk.

ST. CHARLES MILK
UNSWEETENED EVAPORATED

THE HOUSE OF DREAMS-COME-TRUE

—BY—
MARGARET FIEDLER

The "Splendid Folly," "The Hermit Of Far West," Hodder & Stoughton, Ltd., London.

CHAPTER XXVIII—Continued

"Oh, yes; she did. It was quite clear in the afternoon when she started—looked like being a lovely night."

"But—"

Nick stammered and came to a halt. There was a look of bewilderment in his eyes.

"But who's she gone with?" he demanded at last. "I thought she said she intended stopping the night with Judith and Burke at their bungalow."

"So she did," replied Blaise. "Why? Have you any objection?"—smiling.

"No. Only—Nick frowned—"I don't quite understand it. Judith isn't on the Moor?"

"Not on the Moor?" broke simultaneously from Lady Anne and Blaise.

"How do you know, Nick?" added the latter gravely.

"Why, because—Nick's face wore an expression of puzzled concern—"because I saw Judith in Newton Abbott last evening."

Blaise leaned forward, a sudden look of concentration on his face.

"You saw Judith?" he repeated. "What time?"

"It must have been nearly eight o'clock. I was hunting along in Jim Cresswell's car to catch the seventy-five up train, and I saw Judith with one of the Holfords—you know those people from London—turning into the gateway of a house. I expect it was the place the Holfords are stopping at. They didn't see me."

"You're quite certain? You've made no mistake?" said Blaise sharply.

"Of course I've made no mistake. Think I don't know Judy when I see her? But what's the meaning of it, Blaise?"

Tormarin rose to his feet, tossing the stump of his cigarette into the fire.

"I'm not sure," he said slowly. "But I'm going to find out. Madonna," turning to his mother—"did Jean tell you exactly what Judith said when she rang her up on the 'phone about this moonlight plan?"

"It wasn't Judith who rang up," replied Lady Anne, a faint misgiving showing itself in her face. "It was Geoffrey who gave the message."

Tormarin looked at her with a sudden awakened expression in his eyes. There was dread in them, too—keen dread. The expression of a man who, all at once, sees the thing he values more than anything in the whole world being torn from him—dragged forcibly away from the shelter he could give into some unspeakable darkness of disaster.

"That settles it," he pressed his finger against the bell-push and held it there, and when Blaise came hurrying in response to the imperative summons, he said curtly: "Order me a fresh horse round at once—at once, mind. Tell Harding to saddle Orion, and to look sharp about it."

"Blaise—Lady Anne's obvious uneasiness had deepened to a sharp anxiety—"Blaise, what are you going to do? What—what are you afraid of?"

He looked her straight in the eyes. "I'm afraid of just what you are afraid of, madonna: of the devil let loose in Geoffrey Burke's hands."

"And—and you're going to look for her—for Jean?"

"I'm going to find her," he corrected quietly.

Gravity had set its seal on all three faces. Each was conscious of the same fear—the fear they could not put into words.

"But why do you take Orion?" asked Nick. "The little thoroughbred mare—Rodrigo—would do the journey quicker and be lighter of foot over any marshy ground on the Moor."

"Orion can go when he chooses," returned Tormarin. "And he'll choose tonight. Rodrigo is a little bit of a thing, though she's game as a pebble. But she couldn't carry—two."

The significance of Tormarin's choice of his big roan hunter, three-parts thoroughbred and standing sixteen hands, came home to Nick. He nodded without comment.

Silently he and Lady Anne accompanied Blaise into the hall. From the gravelled drive outside came the impatient stamping of Orion's iron-shod hoofs. Just at the last Lady Anne clung to her son's arm.

"You'll bring her back, Blaise?" she urged, a quiver in her voice.

"I'll bring her back, madonna," he answered quietly. "Don't worry."

A minute later he and the great roan horse were lost to sight in the mist of the night. Only the beat of galloping hoofs was flung back to the two who were left to watch and wait, muffled and vague through the shrouding mist like the sound of a distant drum.

CHAPTER XXXI

The Golden Hour

Orion had fully justified Blaise's opinion of his capabilities. As though the great horse had gathered that there was trouble abroad to which he must not add, he had needed neither whip nor spur as he carried his master with long, sweeping strides over the miles that lay betwixt Stables and the Moor. He was as fresh as paint, and the rush through the cool night, under a rider with hands as light as a woman's and who set him with a flexible ease, akin to that of a Cossack, had not disturbed him in the very least.

Now they were climbing the last long slope of the white road that approached the bungalow, the reins lying loosely on Orion's neck.

The mist had lifted a little in places, and a watery-looking moon appeared through the clouds now and again, throwing a vague, uncertain light over the blurred and sombre landscape.

Tormarin had no very definite plan of campaign in his mind. He felt convinced that he should find Jean at the bungalow. If, contrary to his expectation, she were not there, nor anyone else to whom he could apply for information as to her whereabouts, he would have to consider what his next move must be.

Meanwhile, his thoughts were preoccupied with the main fact that she had failed to return home. If she had accepted Burke's invitation to the bungalow, believing that Judith and the Holfords would be of the party, how was it that she had not at once returned when she discovered that for some reason they were not there?

Some weeks ago—during the period in which she was definitely investigating the possibilities of an "unexploded bomb"—it was quite possible that the queer recklessness which sometimes tempts a woman to experiment in order to see just how far she may go—the mysterious delight that his feminine temperament appears to derive from dancing on the edge of a precipice—might have induced her to remain and have tea with Burke, chaperon or no chaperon. And then it was quite on the cards that Burke's lawless disregard of anything in the world except the fulfilment of his own desires might have engineered the rest, and he might have detained her at the bungalow against her will.

But Blaise could not believe that a "tea-tea" tea with Burke would hold any attraction for Jean now—not since that day, just before the visit to London, when he and she had been discussing the affairs of Nick and Claire and had found, quite suddenly, that their own hearts were open to each other and that with the spoken word, "Beloved," the misunderstandings of the past had faded away, to be replaced by a wordless trust and belief.

But if it "had" attracted her, if—knowing precisely how much the man she loved would condemn—she had still deliberately chosen to spend an afternoon with Burke, why, then, Blaise realized with a swift pang that she was no longer his Jean at all but

some other, lesser woman. Never again the "little comrade" whose crystalline honesty of soul and sensitive response to all that was sweet and wholesome and true had come into his scarred life to jewel its arid places with a new blossoming of the rose of love.

He tried to thrust the thought away from him. It was just the kind of thing that Nesta would have done, playing off one man against the other with the innate instinct of the born coquette. But not Jean—not Jean of the candid eyes.

Presently, through the thinning mist, Tormarin discerned the sharp turn of the track which branched off from the road towards the bungalow, and quickening Orion's pace, he was soon riding up the steep ascent, the moonlight throwing strange, confusing lights and shadows on the mist-wet surface of the ground.

Suddenly, without the slightest warning, the roan snorted and wheeled around, shying violently away from the off-side bank. A less good horseman might have been unseated, but as the big horse averted Tormarin's knees gripped against the saddle like a vice, and with a steady word he faced him up the track again, then glanced keenly at the overhanging side of the roadway to discover what had frightened him.

A moment later he had jerked Orion to a sudden standstill, leapt to the ground and, with the reins over his arm, crossed the road and stood where, clad in some light stuff that glimmered strangely in the moonlight, lay a slender figure, propped against the bank.

"Blaise!" Jean's voice came weakly to his ears, but with glad note in it of immense relief that bore witness to some previous strain.

In an instant Tormarin was kneeling beside her, one arm behind her shoulders. He helped her to her feet and she leaned against him, shivering. Feeling in his pockets, he produced a brandy flask and held it to her lips.

"Drink some of that!" he said. "Don't try to tell me anything yet."

The raw spirit sent the chilled blood racing through her veins, putting new life into her. A faint tinge of colour crept into her face.

"Oh, Blaise! I'm so glad you've come—so glad!" she said shakily.

"Yes, yes," he returned grimly. "See, drink a little more brandy. Then you shall tell me all about it."

At last, bit by bit, she managed to give him a somewhat disjointed account of what had occurred.

"I think I must have been stunned a little when I fell," she said. "I can't remember anything after stepping right off into space, it seemed, till—oh, afterwards—I found myself lying here. And when I tried to stand, I found I'd hurt my ankle and that I couldn't put my foot to the ground."

"With a weak little attempt at laughter—"I just sat down again."

Blaise gave vent to a quick exclamation of concern.

"Oh, it's nothing really," she reassured him hastily. "Only a strain. But I can't walk on it." Then, suddenly, clinging to him with a nervous dread: "Oh, take me away, Blaise—take me home!"

"I will. Don't be frightened—there's no need to be frightened any more, my Jean."

"No, I know, I'm not afraid—now."

But he could hear the sob of utter nerve stress and exhaustion back of the brave words.

"Well, I'll take you home at once," he said cheerfully. "But, look here, you've no coat on and you're wet with mist."

"I know. My coat's at the bungalow. I left in a hurry, you see!"—whimsically. The irrepressible Peterson element, game to the core, was reasserting itself.

"Well, we must fetch it—"

"Not now!" Her voice rose in hasty protest. "I won't—I can't go back!"

"Then I'll go."

"No—don't! Geoffrey might be there—"

"So much the better," grimly. "I'd like five minutes with him." Tormarin's hand tightened fiercely on the hunting-god he carried. "But he's more likely lost his way in the mist and fished up for enough away."

"Probably," with a short laugh—"he's still searching Dartmoor for you. You'll be on his mind a bit, you know! Wait here a minute while I ride up to the bungalow."

But he clung to his arm.

"No, not Dartmoor! I—I can't be left alone—again."

The fear was coming back to her voice and Blaise, detecting it, abandoned the idea at once.

"All right, little Jean," he said reassuringly. "I won't leave you. Put my coat round you"—stripping it off. "There—like that." He helped her into it and fastened it with deft fingers.

"And now I'm going to get you up on to Orion and we'll go home."

"I shall never get up there," she observed, with a glance at the roan's

great shoulders looming through the mist. "I shan't be able to spring—I can only stand on one foot, remember."

Blaise laughed cheerily. "Don't worry. Just remain quite still—standing on your one foot, your poor little lame duck!—and I'll do the rest."

She felt his arms release its clasp of her, and a moment later he had swung his leg across the horse and was back in the saddle again. With a word to the big beast he dropped the reins on to his neck and, turning towards Jean, where she stood like a slim, pale ghost in the moonlight, he leaned down to her from the saddle.

"Can you manage to come a step nearer?" he asked.

"She hobbled forward painfully. "Now!" he said.

Lower, lower still he stooped, his arms outthrust, and at last she felt them close around her, lifting her with that same strength of steel which she remembered on the mountain at Montevideo. Orion stood like a statue—motionless—as if he knew and understood all about it, his head lowered round a hit as though watching until the little business should be satisfactorily accomplished, and blowing gently through his velvety nostrils meanwhile.

(To Be Continued.)

THE RHYMING OPTIMIST

By Aline Michaels

MUSIC

In music there are voices not of earth: Such soaring harmony As only in celestial spheres has birth, And mounts triumphant free.

Tonight, across the world, as music creeps Upon the moonlight's tide, Each musing thought of pain and sorrow sleeps, Each grief is swept aside.

And now the sweet, ecstatic melodies, In floods of sound advance, To bear the soul across untravelled seas, On beauty's wide expanse.

Ah, music, whisper softly in my ear; Awake no wonder of day; Trap me in wonder with your voices clear, Charm every hurt away.

Made Four-Point Landing

Dog at Niagara Falls, Ontario, Makes Parachute Jump.

Cal, four-year-old silver grey police dog of Harold Brooker, of Niagara Falls, Ont., upheld all the traditions of faithful dog when he followed his master from the wing of an aeroplane in the first dog parachute jump known.

Cal wore a separate "chute" and floated gracefully to earth, making a four-point landing only a few feet away from Brooker.

Japan Bars Absinthe

Japan soon will have no more absinthe. The home office of the Japanese government, after considerable research, has decided to ban the sale of the green liqueur, on the ground that it is particularly injurious.

Prison Inspector: These paper bags you've made are terrible.

Convict: If my work does not suit, I'll gladly leave.

DR. HAMILTON'S PILLS
HEADACHE
INDIGESTION
BILIOUSNESS
CONSTIPATION

Smithson: "How long have you worked in that office?"

Greene: "Since they threatened to fire me."

The life of a single hair on a human's head is estimated to be from six to ten years.

St. Boniface Priest Builds Fine Organ

Instrument Is Marvel Of Tonal Richness and Sweetness.

A workshop which might well rival those of his priestly craftsmen of the middle ages is maintained by Brother Sylvestre, of the Oblate order, in St. Boniface. In his workshop, Brother Sylvestre, during his spare time in the past 12 months, has built a beautiful two-manual, pneumatic-action organ, perfect in degree of quickness and sensitiveness.

The instrument is designed along the same lines as Casavant Freres instruments and is a marvel of tonal richness and sweetness. It is a product of great natural genius, rare skill and long hours of labor.

Brother Sylvestre is a Frenchman by birth. He came to Canada in 1891 from his native Savoy, where his parents had apprenticed him to a blacksmith. On his arrival in Canada he was for 10 years in the service of the Oblate Order as a builder of mission schools and buildings in northern Canada.

It was in 1910 that he became interested in musical mechanics and for some years he has enjoyed a reputation as a maker of high-grade piano and chromatic accordions, work which gave him valuable training for the more difficult task which has now reached a successful consummation.

What Brother Sylvestre will do with his organ now that it is completed has not been decided. He may present it to some mission in the far north, but he sees objection to that since only highly skilled musicians could play it and such are not to be found in that area of French-Canadian mission.

Canada Has No Border Patrol In British Columbia.

Hundreds of "boatmen" from the state of Washington, practically all of them United States citizens, are reported drifting across the international boundary into British Columbia, with Vancouver generally as their destination.

Canada maintains no border patrol in British Columbia and crossing of the boundary outside the recognized gateway is an easy matter.

All mothers can put away anxiety regarding their suffering children by using the famous "Mother's Own" Worm Exterminator to give relief. Its effects are sure and lasting.

China Man Won Out.

A Chinese gardener sold a horse to a farmer, and during the transaction he repeatedly said: "Horse no look well, but plenty put!"

It was subsequently discovered that the animal was blind, and, incensed at being taken in by a Chinese, the purchaser took John to court.

"Did you know the horse was blind?" asked the magistrate.

"Yes, I know long tan," John replied.

"Then why didn't you tell him so?" the magistrate demanded.

"I tell him all," said the Chinese. "I tell him plenty tan horses no look well."

That being admitted, the case was dismissed.

Important Minerals Of Canada.

Sixteen important minerals produced in Canada are listed by the Canadian Government Bureau of Statistics in a recent return. They include: asbestos, cement, clay products, coal, copper, feldspar, gold, gypsum, lead, lime, natural gas, nickel, petroleum, salt (commercial), silver and zinc.

Special Offer.

Most grocers, druggists and department stores have Canapar on sale, but if years have passed, send this coupon direct to the makers and we'll give you a new and unique booklet entitled "Canapar," containing one hundred recipes, as a bonus for your trouble.

Little Helps For This Week

First the blade, then the ear, after that the full corn in the ear.—Mark iv. 28.

Then clearest thy secret growth, nor catch At noise, but thrive unseen and dumb; Keep clean, bear fruit, earn life, and watch, Till the white-winged reapers come.—Henry Vaughan.

The Author and Giver of all good things expects us to grow and improve. He offers to increase in us true religion, to nourish us in all goodness. The gospel is a call to progress and improvement; it bids us never tire in our works of charity, but as fast as one kind purpose is accomplished start about another. Let charity, gentleness, and love be as the breath you draw.—John Keble.

What is thought the earliest mention of the egg as food is found in the book of Job. In Job 6.6 it is said: "Is there any taste in the whites of an egg?"

A railway season ticket, covering 175 miles of travel, was issued to a dog, at Plymouth, so it could accompany its mistress, a travelling saleswoman, on her trips.

Thirty-five thousand women in Aberdeen are unmarried. They should import a Northwest Mounted policeman to show them how to get their man.

Cone-shaped snowflakes are sometimes observed in snowfall.

You can cook 3 Vegetables AT ONCE

in the same saucepan by using CANAPAR

Do each vegetable up in its own bag of Canapar Cookery Parchment.

There won't be any odor, not even from cauliflower. All the food value and flavor will be retained. And you use only one burner turned low for cooking. The flavors will not mix!

Do the same with boiled or steamed fish. You'll be delighted with the results. No fishy odor in the kitchen. No saucepan or kettle to clean up. When roasting meat, line your pan with Canapar. Fat and juices won't burn. No more scraping or scouring of the pan afterwards.

You can use Canapar repeatedly by simply rinsing it off and hanging up to dry. It doesn't absorb odors. Makes a perfect dish cloth. Silky, strong, and doesn't spread lint. Made by the makers of the famous PAR-KANT Heavy Waxed Paper in the Green Box.

Most grocers, druggists and department stores have Canapar on sale, but if years have passed, send this coupon direct to the makers and we'll give you a new and unique booklet entitled "Canapar," containing one hundred recipes, as a bonus for your trouble.

Alberta Pool Elevators Announcement

Alberta Pool Elevators will be operated during the current crop year in the same manner as in the crop year just passed; that is to say, these elevators are free to receive delivery of grain from any person.

Alberta Wheat Pool members are given the option of disposing of their grain under any of the methods provided by the Canada Grain Act and obtaining the full current market price for same; or disposing of their wheat on pool basis, accepting the prevailing initial payment, and participating in any future payments that may accrue from the pooling thereof.

Definite assurance is given that no reductions for Elevator Reserve or Commercial Reserve, or for repayment of the 1929 overpayment, will be taken from the proceeds of any grain delivered for pooling or for immediate sale during 1932-33 crop year.

It should be clearly understood by Pool members that the statement recently sent out covering the member's position on the 1929 overpayment are merely for information of the individual member. These statements are not a demand for repayment of the 1929 overpayment in any respect.

Complete Organization

United Grain Growers operate more than 450 elevators in Western Canada. Great terminal elevators are operated at Port Arthur and Vancouver. Offices are maintained at Vancouver and New York.

The complete organization of this Company, its highly trained staff, its constant contacts with all markets where Canadian Grain is sold, and its financial strength, all contribute to its ability to give good service to western farmers in handling their business.

Madden Won Baseball Pennant

Two Baseball Games and a Football Game Played at Madden on Sunday

A record crowd witnessed the baseball game at Madden on Sunday afternoon, when Madden won the Bush League pennant by defeating Dog Pound by a score of 11 runs to 5, giving them the series in two straight games.

Dog Pound got away to a good start, when Lake Parsons crashed the first ball pitched for a long home run. It was a ding-dong contest for seven innings with plenty of good baseball to keep the large crowd on edge.

Jimmie Williamson pitched a good brand of ball for seven innings but weakened and the Madden sluggers got to him for enough runs to cinch the game.

There is little to choose between these two teams in fielding and batting. Tommie Borbridge was the stumbling block that gave Madden the edge. Borbridge has not the speed nor the assortment of curves, that some of the Alberta amateur pitchers possess, but has a fair assortment of curves, good control and uses his head for more than to carry his hat on.

Batteries: Madden—T. Borbridge and K. Borbridge; Dog Pound—J. Williamson and F. Banta.

Umpires—Bob Smart of Crossfield and Fred Landers, Madden. Following the senior game the Crossfield and Dog Pound Intermediates played. The game was too one sided to be interesting and when the tallies were counted it was found that Crossfield had crossed the platter 17 times and Dog Pound but twice.

The Crossfield youngsters played snappy ball behind excellent pitching by Ronnie McFadyen, who was setting them down in big league style.

Russ James was the heavy hitter of the game, getting two home in his first two trips to the plate. Hans Patmore behind the bat played a great game and should go big in senior company.

The Crossfield team: H. Patmore, c; R. McFadyen, p; R. Fleming, 1b; M. Heywood, 2b; G. Johnson, ss; R. James, 3b; S. Pogue; I. R. Gilchrist, cf; E. Gordon, rf; E. Sharp, 3b; F. Heywood, cf.

The Jimmies football team of Calgary played at Madden on Sunday, and although Madden were defeated by two goals to one, they showed that with practice they would be more than a match for the Calgary team.

Madden has a number of real football players and although they have had but very little practice this year, extended the Calgary team to the limit to gain a one goal victory.

WAR MEMORIAL AT DIDSBURY

The beautiful cairn erected by the members of the Didsbury Branch of the Canadian Legion B. E. S. L. to the memory of the men of the district who gave their lives in the service of the Country was unveiled on Sunday afternoon before a large crowd which gathered to take part in the service.

Mr. Arthur Speakman, M.P. who has always taken an active part in the interest of all returned men, unveiled the memorial and in a most impressive manner outlined the difficulties of the war veteran since his return, comparing conditions as they exist with the promises made on his enlistment.

The veterans marched from their H. Q. (150 strong) and formed up at the memorial, where in a short but impressive service due respect was paid to their fallen comrades.

Local and General

Keep in mind the Bush League Baseball tournament in Crossfield on Saturday, August 20th.

Chris Asmusen and Louie Overby were business visitors in Olds on Monday.

Noel Cook of Calgary is spending the holidays at the home of Mr. and Mrs. J. Scholfield.

Mrs. Addeley returned home on Monday night after spending a few days at the home of Mr. and Mrs. H. Michien.

Mr. and Mrs. C. H. McMillan and children left on Sunday for Sylvan Lake where they have taken a cottage for two weeks.

Miss Gladys Methel who is teaching school at Drayton Valley, is spending a months vacation at the home of her parents, Mr. and Mrs. J. P. Methel.

Miss Alice Colliant who has been holidaying at the coast for the past three weeks returned home on Monday.

Bubbles Goldie who will take her Grade XI in Crossfield this year wrote and passed eight subjects at the Carstairs school last term.

In the examination results published last week, we stated that Catherine Laut wrote and passed four subjects. This should have read that Miss Laut wrote and passed six subjects.

GOOD TIME AT S. S. PICNIC
The United Church Sunday School picnic was held on Monday last at Mr. Murdoch's west ranch. Nine cars and a truck loaded to capacity left the church about two p.m.

The afternoon was spent in races etc. Ice cream and drinks were supplied to all present. About five o'clock a real picnic lunch was served by the ladies. The return journey being started about 6.30, and every one voted the picnic as enjoyable as any yet held.

ROSEBUD COUNCIL MEETING
A meeting of the Council took place in Carstairs on Friday 12th inst, all members present.

Several hospital accounts were reported on and dealt with in accordance with the requirements of the Act.

Circular letter from the S. S. B. stating that settlers would in future be expected to look after their taxes direct, and advising this Municipality to make every effort to collect, was discussed at length and the Secretary-Treasurer was instructed to notify all settlers whose taxes had been paid by the S. S. B. that unless same is paid before 15th Dec. next the Municipality would be compelled to make seizure.

It was agreed to grant an extension of leave to Mr. McCrory for two months from this date, without remuneration, and to increase the salary of Mr. Sutherland, Acting Sec. Treas. to \$100.00 per month.

Several accounts and incidental matters in connection with the affairs of the district were also dealt with.
